## 5.10 Levels of assessment - Overlays

The following tables identify where an overlay changes the level of assessment from that identified in a zone or local plan and the relevant assessment criteria.

**Table 5.10:1 – Assessment criteria for overlays** <sup>28</sup>

| Development                                                                                                                                                                                    | Level of assessment | Assessment criteria            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|--------------------------------|
| <b>Agricultural Land Overlay</b>                                                                                                                                                               |                     |                                |
| All assessable development                                                                                                                                                                     | No Change           | Agricultural Land Overlay Code |
| <b>Airport Environs Overlay</b>                                                                                                                                                                |                     |                                |
| All assessable development not elsewhere listed in this table                                                                                                                                  | No Change           | Airport Environs Overlay Code  |
| Caretaker's Accommodation<br>If:<br>(i) within <a href="#">ANEF contour 20 and above</a> ; <del>the 20 to 25 ANEF</del> ; and<br>(ii) exempt or self assessable within the corresponding zone. | Code Assessable     | Airport Environs Overlay Code  |

## 6.2 Residential zones category

### 6.2.1 Low Density Residential Zone Code<sup>2</sup>

#### 6.2.1.1 Application

This code applies to assessable development:-

- (1) within the Low Density Residential Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Low Density Residential Zone Code by the tables of assessment in Part 5 (Tables of Assessment).

#### 6.2.1.2 Purpose and overall outcomes

- (1) The purpose of the Low Density Residential Zone code is to provide for predominantly dwelling houses supported by community uses and small-scale services and facilities that cater for local residents.

The amenity and lifestyle of residents in the Low Density Residential Zone is conserved while providing mechanisms to promote and implement a mix of housing forms at a density appropriate to each locality and providing a mix of small scale uses that service the day to day needs only of local residents.

- (2) The overall outcomes sought for the zone code are as follows:
  - (a) A range of house, predominantly detached dwelling houses and dual occupancies, on a range of lot sizes is provided;
  - (b) multiple dwellings and retirement villages are established in the Low Density Residential Zone only where they achieve a scale and density that is consistent with the surrounding area;
  - (c) development provides for an efficient land-use pattern and is well connected to other parts of the local government area;
  - (d) development is designed to provide safe and walkable neighbourhoods that connect residents to desirable destinations including schools, parks, shops and community facilities;
  - (e) small scale short-term accommodation occurs only on land with direct access to a road at the distributor, sub-arterial and regional arterial level in the road hierarchy and in proximity to existing development of a similar nature, in buildings of a scale that is consistent with the surrounding residential area, all car parking needs can be met on site, and the use does not detract from the residential amenity of the area.
  - (f) development maintains a high level of residential amenity avoiding uses that introduce impacts such as traffic, noise, dust, odour, lighting and other locally specific impacts;
  - (g) development reflects and enhances the existing low density scale and character of the area, and is no more than 2 storeys above ground level;
  - (h) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourage sustainable transport use such as walking, cycling and public transport use;
  - (i) development is supported by necessary community facilities, open space and recreational areas and appropriate infrastructure including utility installations to support the needs of the local community;
  - (j) non-residential uses occur only where such uses directly support the day to day needs of the immediate residential community, are located on land with direct access to a road at the distributor, sub-arterial and regional arterial level in the road hierarchy, are in buildings of a scale that is consistent with the surrounding residential area or reuse existing non-residential premises, all car parking needs

<sup>2</sup> Amended on 3 November 2014

can be met on site and do not undermine the viability of nearby centres. Such uses include:

- (i) Child care centre.
  - (ii) Club.
  - (iii) Community care centre.
  - (iv) Community use.
  - (v) Educational establishment.
  - (vi) Emergency services.
  - (vii) Shop (convenience only).
  - (viii) Health care services.
  - (ix) Place of worship.
  - (x) Sales office.
  - (xi) Veterinary services.
- (k) development responds to the natural topography and environmental constraints of the land and avoids or where this is not possible, mitigates any adverse impacts on areas of ecological significance, including creeks, gullies, steep land, waterways, wetlands, habitats and vegetation and bushland through location, design, operation and management.

#### **Clifford Park Stables Precinct**

- (3) The overall outcomes of the Clifford Park stables precinct within the Low Density Residential zone are:
- (a) animal keeping in the form of commercial stables is established in conjunction with a dwelling house on the same site, which provides for on site management of the stables;
  - (b) while acknowledging that the precinct will experience noise and odour associated with well managed training stables, the potential for excessive impact on residential amenity is minimised in new development;
  - (c) residential development in the Clifford Park stables precinct is not intensified by way of dual occupancies, multiple dwellings or creation of lots less than 1,200m<sup>2</sup>, in order to limit conflict between stable development and neighbouring residential uses and to maximise opportunities for stables to establish in proximity to the racecourse.

#### **Park Residential Precinct**

- (4) The overall outcomes of the Park Residential precinct within the Low Density Residential zone are:
- (a) land in this precinct accommodates dwelling houses in a very low density setting, with lots greater than 2,000m<sup>2</sup>;
  - (b) development does not require access to wastewater and lots remain sufficiently large to enable on-site treatment and disposal of effluent; and
  - (c) non-residential uses are not located in this precinct.

### 6.2.1.3 Criteria for assessment

**Table 6.2.1:1 – Low Density Residential Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                      | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## 6.2.2 Low-medium Density Residential Zone Code<sup>3</sup>

### 6.2.2.1 Application

This code applies to assessable development:-

- (1) within the Low-medium Density Residential Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Low-medium Density Residential Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.2.2.2 Purpose and overall outcomes

- (1) The purpose of the Low-medium Density Residential Zone Code is to provide for a range and mix of dwelling types including dwelling houses and multiple dwellings supported by community uses and small-scale services and facilities that cater for local residents.  
The code will ensure that the amenity and lifestyle of residents in the Low-medium Density Residential Zone is conserved while providing mechanisms to promote and implement a mix of housing forms at a density appropriate to each locality and precinct and including a limited mix of non-residential uses that are only intended to service the day to day needs of residents located within the zone. Land within this zone will accommodate the majority of residential growth to occur within the Toowoomba Region over the life of the planning scheme.
- (2) The overall outcomes<sup>4</sup> sought for the zone code are as follows:
  - (a) Development provides a range and mix of residential dwelling choices including dwelling houses on smaller lots, dual occupancies, multiple dwellings, residential care facilities, retirement facilities and short-term accommodation that are compatible with the intended scale of the Low-medium Density Residential Zone. Overall development should achieve a net density of at least 40 dwellings per hectare in existing urban areas but may achieve or exceed densities of 80 dwellings per hectare in new urban areas or where land is in proximity to major activity centres;
  - (b) most new development within existing urban areas will be in the form of multiple dwellings and dual occupancies that will contribute to raising the residential densities of those areas by maximising yields while also achieving a high level of residential amenity avoiding uses that introduce impacts such as traffic noise, dust, odour, lighting and other locally specific impacts;
  - (c) development that is a higher density than existing development within the immediate area should not seek to replicate the same built form and scale as surrounding development, but must be designed in a manner that enables it to be integrated into the existing urban landscape and streetscapes;
  - (d) broadacre subdivision within new urban areas such as Glenvale, Darling Heights, Highfields and parts of Pittsworth will contribute to the creation of new communities by providing a mix of lot sizes that facilitates a range of residential dwelling choices achieving a minimum net density of 15 dwellings or more per hectare for dwelling houses, and increased development yields for other residential dwelling types achieving a minimum of 40 dwelling units per hectare or more;
  - (e) a high quality streetscape and public open space network is provided that comprises connected public spaces and parks, and links to key community activities;
  - (f) the existing open space network is preserved and enhanced and new open space connections are established;
  - (g) short-term accommodation occurs only where in proximity to existing development of a similar nature and on a road at the distributor, sub-arterial and regional arterial

<sup>3</sup> Amended on 3 November 2014

<sup>4</sup> Applicants should note that development may also be subject to the provisions of a local plan or an overlay which may identify varied or additional outcomes in particular locations.

- level in the road hierarchy, where all car parking needs can be met on site, and it does not detract from the residential amenity of the area;
- (h) development provides a high level of residential amenity and development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourage sustainable transport use such as walking, cycling and public transport use;
  - (i) the scale and density of development facilitates an efficient land use pattern that supports compact and walkable neighbourhoods that are well connected to employment nodes, centres, open space and recreational areas, community services and educational opportunities;
  - (j) non-residential uses occur only where such uses directly support the day to day needs of the immediate residential community located in the zone and do not undermine the viability of other centres or centres network, are located with direct access to a road at the distributor, sub-arterial and regional arterial level in the road hierarchy, are in buildings of a scale that is consistent with the surrounding residential area or are a reuse of existing non-residential buildings, and all car parking needs can be met on site. Such uses include:
    - (i) Child care centre.
    - (ii) Club.
    - (iii) Community care centre.
    - (iv) Community use.
    - (v) Educational establishment.
    - (vi) Emergency services.
    - (vii) Health care services.
    - (viii) Place of worship.
    - (ix) Shop.
    - (x) Veterinary services.
  - (k) development responds to land constraints, including but not limited to topography, bushfire and flooding constraints;
  - (l) development mitigates any adverse impacts on areas of ecological significance, including creeks, gullies, steep land, waterways, wetlands, habitats and vegetation and bushland through location, design, operation and management; and
  - (m) development is supported by necessary infrastructure including utility installations to support the needs for the local community.

#### Regional Residential Precinct

- (3) The overall outcome of the Regional residential precinct within the Low-medium Density Residential Zone is that:
  - (a) development is predominantly two (2) storeys above ground level, maintains privacy for residents within and adjacent to the site, does not result in a loss of sunlight of adjoining residential properties and makes a positive contribution to the urban landscape and streetscape;
  - (b) while development within this precinct will contribute to increasing residential densities, the level of increase achieved in the Regional residential precinct will be less than that in the Urban residential and Urban consolidation precincts as the Regional residential precinct applies to townships where densities of the same level as Toowoomba City would be inappropriate.

#### Urban Residential Precinct

- (4) The overall outcomes of the Urban residential precinct within the Low-medium Density Residential Zone are that:

- (a) development is predominantly three (3) storeys above ground level, maintains amenity and privacy for residents within and adjacent to the site, does not result in a loss of sunlight of adjoining residential properties and makes a positive contribution to the urban landscape and streetscape;
- (b) broadacre land within this precinct provides opportunities to increase the diversity of residential mix and provide new higher density building forms that would be difficult to integrate into existing urban localities. Within these areas the density of individual developments will vary from a minimum net density of 15 dwellings per hectare for dwelling houses to 40 dwellings per hectare or more for other residential activities;
- (c) where this precinct is applied to existing urban areas residential densities achieved by individual developments are higher than in the Regional Residential Precinct, but lower than in the Urban Consolidation Precinct with net densities of between 40 dwellings per hectare and 60 dwellings per hectare.

#### Urban Consolidation Precinct

- (5) The overall outcomes of the Urban consolidation precinct within the Low-medium Density Residential Zone are that:
  - (a) residential development of varying densities is dispersed throughout the precinct to support the function of the major centres, to optimise access to public transport and to provide a transition between surrounding lower density residential areas and the increased scale and density of development within the major centres;
  - (b) residential densities are higher than in other parts of the Low-medium Density Residential Zone, with individual developments achieving net densities of 60 dwellings per hectare or more;
  - (c) where the precinct occurs within proximity to the Kearney's Spring and Clifford Gardens major centres, residential densities of 60 to 80 dwellings per hectare should be achieved within buildings of up to 6 storey above ground level, where fronting roads at distributor level or higher, public transport routes, or public open space. Development in other parts of the precinct will generally be up to 3 storeys high;
  - (d) the amalgamation of low density residential lots facilitates the development of high quality medium and higher density residential forms;
  - (e) strong active transport and efficient public transport linkages are established to the nearby centres, community facilities and the open space network.

#### Hospital Support Precinct

- (6) The overall outcomes of the Hospital support precinct within the Low-medium Density Residential Zone are that:
  - (a) complementary uses that support and relate to the existing hospitals are established in the Precinct including, Medical Centres and accommodation for people needing to stay near the Hospital;
  - (b) while the predominant uses in the Precinct will be increasingly non-residential, development is of a character and scale that is compatible with the residential development surrounding the Precinct and does not exceed 4 storeys;
  - (c) community and recreation uses do not locate in the Precinct unless such uses are allied to the existing hospitals;
  - (d) industrial, rural and other commercial uses do not locate in the Precinct; and
  - (e) in respect to lots fronting Prosser Street between Herman and Holberton Street, development for non-residential purposes is only carried out if the lot is amalgamated with land fronting Pioneer or Holberton Street and all access to the development is provided via Pioneer or Holberton Street.

#### Office Residential Precinct

- (7) The overall outcomes of the Office Residential Precinct within the Low-medium Density Residential Zone are that:

- (a) development is predominantly three (3) storeys above ground level, maintains amenity and privacy for residents within and adjacent to the site, does not result in a loss of sunlight of adjoining residential properties and makes a positive contribution to the urban landscape and streetscape;
- (b) in addition to the non-residential uses supported in the Low-medium Density Residential Zone (6.2.2(3)(j)), land within this Precinct is also developed as offices; and
- (c) while the predominant uses in the Precinct will be increasingly non-residential, development is of a character and scale that is compatible with the residential development surrounding the Precinct.

### 6.2.2.3 Criteria for assessment

**Table 6.2.2:1 – Low-medium Density Residential Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                      | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## 6.3 Centre zones category

### 6.3.1 Principal Centre Zone Code<sup>5</sup>

#### 6.3.1.1 Application

This code applies to assessable development:-

- (1) within the Principal Centre Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Principal Centre Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.3.1.2 Purpose and overall outcomes

- (1) The purpose of the Principal Centre Zone Code is to provide for the largest and most diverse mix of uses and activities that forms the core of an urban settlement.  
It includes key concentrations of high-order retail, commercial, employment, residential, health services, administrative, civic, community, cultural, recreational and entertainment activities and other uses, which reinforce the primacy of the centre as the heart of Toowoomba and major service centre for the Region, capable of servicing the planning scheme area.  
The most intense forms of development concentrate to facilitate a compact and sustainable mixed use centre that encourages the efficient use of resources and alternative transport modes, best practice built form and environmental outcomes, and strong social and cultural engagement.  
Development facilitates a mix of uses that increase the intensity and diversity of activity within the centre throughout the day and night creating an active and people-oriented environment that is safe, vibrant, attractive, connected and inclusive. Diverse and innovative built form outcomes contribute to the creation of the highest quality public realm with improved street facades, landscape treatments, and interaction with public spaces that strengthen the identity of Toowoomba City as a 'garden city'.  
The heritage character of the centre is retained through the reuse of historic buildings and elements to support a rich and interesting environment.  
Development mitigates the impact of the car, promotes public transport usage and creates an environment where pedestrians and cyclists have priority.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) Land Use
    - (i) The mix of uses within the centre provides increased accessibility and choice, diverse employment opportunities and social mix, and increased levels and diversity of activity throughout the day and night, affording a more activated place with vibrancy at street level.
    - (ii) The character and built form of development is characterised by recognisable retail, commercial and civic cores, while allowing for a mix of uses.
  - (b) Built Form
    - (i) Development acknowledges and responds to the city's distinctive setting, culture, heritage and garden city character.
    - (ii) Building height, scale and density assists in the realisation of compact and sustainable development.

<sup>5</sup> Amended on 3 November 2014

- (iii) The scale, character and built form of development incorporates diversity in building types.
  - (iv) Built form contributes to the human scale of the key pedestrian streets of centre and particularly Margaret, Ruthven and Russell Streets.
  - (v) Development creates attractive, pedestrian friendly and active frontages.
  - (vi) Development integrates laneways, mid-block connections and incidental spaces to create safe and active pedestrian connections and spaces which present as visually engaging and fine grained urban form.
- (c) Public Realm
  - (i) Development contributes towards an attractive, comfortable, active, safe and responsive public realm that enriches the centre and defines a clear urban character.
- (d) Movement
  - (i) A balance between traffic movements and convenient and accessible car parking, and a safe, high quality pedestrian and cycling environment is achieved.
  - (ii) Development provides a place which is safe, easy and attractive to access and to move around, where pedestrians and cyclists have priority.
  - (iii) Development contributes towards a highly connected and permeable environment for pedestrians, which enriches the pedestrian experience, promotes walking and improves linkages within the centre and to surrounding areas.
- (e) Open Space
  - (i) Development retains and enhances the established green character of the centre.
  - (ii) Amenity is strengthened through landscape treatments and well located open space.
  - (iii) Development contributes towards an integrated, interconnected, and attractive open space system by actively addressing and responding to these spaces, strengthening linkages to and between them.
  - (iv) Development facilitates the creation of new open spaces, including a major new garden square as a focus for civic life, the reinforcement of the West Creek Corridor and a civic space surrounded by civic, community, recreation and cultural uses within the civic heart.
- (f) Sustainability
  - (i) Development provides sustainable outcomes including compact urban form, and maximises efficiencies in transport, energy, land use and infrastructure.
- (g) Development is supported by necessary infrastructure including utility installations to support the needs of the local community.

### 6.3.1.3 Criteria for assessment

**Table 6.3.1:1 – Principal Centre Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## 6.3.2 Major Centre Zone Code<sup>10</sup>

### 6.3.2.1 Application

This code applies to assessable development:-

- (1) within the Major Centre Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Major Centre Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.3.2.2 Purpose and overall outcomes

- (1) The purpose of the Major Centre Zone code is to provide for a mix of uses and activities. It includes concentrations of higher order retail, commercial, offices, residential administrative and health services, community, cultural and entertainment facilities and other uses capable of servicing a subregion in the planning scheme area. Development complements, but does not compromise the role and function of the Principal Centre. The centres are highly accessible and well connected to the subregional catchments they serve. The Major Centres are identified as:
  - (a) Clifford Gardens.
  - (b) Kearneys Spring.
  - (c) Wilsonton.
  - (d) Highfields.
  - (e) Crows Nest.
  - (f) Clifton.
  - (g) Pittsworth.
  - (h) Millmerran.
  - (i) Oakey.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) development does not undermine the viability, role or function of the Principal Centre;
  - (b) provision of a full range of centre activities, including traditional retailing, bulky goods retailing, commercial, community, entertainment, cultural and residential uses;
  - (c) retail uses are distributed throughout the Major Centre and are configured to maximise the vibrancy of public space and semi-public space;
  - (d) residential development and tourist accommodation is provided at an appropriate scale and integrates with and enhances the fabric of the centre;
  - (e) development provides a high level of amenity, embraces sustainable practices and is reflective of the surrounding character of the area;
  - (f) public open space areas including malls, plazas, parks and gardens are provided;
  - (g) development maximises public transport accessibility and use and encourages walking and cycling;
  - (h) development has access to infrastructure, including utility installations, and essential services that is consistent with the requirements of employment areas activity nodes;
  - (i) development is designed to maximise energy efficiency, water conservation and sustainable living and transport use;
  - (j) accommodate the small to medium scale office needs of the major centre catchment;
  - (k) accommodate a range of major centre level retail activities including discount department stores that service the retail needs of the major centre catchment, but not including Department Stores;

<sup>10</sup> Amended on 3 November 2014

- (l) development meets the community and entertainment needs of the major centre catchment;
- (m) large format retailing (being showrooms) occur on the fringe of the centre where they do not detract from the:
  - (i) permeability of the centre for pedestrians and cyclists;
  - (ii) desired built form or public realm for the centre; or
  - (iii) efficiency of transport networks.
- (n) multiple dwellings and short-term accommodation are incorporated into centres as part of a mixed use or as a stand-alone development at an appropriate scale and density, achieving a minimum density of 40 dwellings per hectare or greater and integrate with and enhances the fabric of the centre;
- (o) service industries that meet the needs of the catchment and do not adversely impact on the overall amenity or functionality of the major centre are located in the zone;
- (p) development is well-designed, incorporates public open spaces and is clustered around public and active transport facilities to provide for and promote the use of public transport, walking and cycling;
- (q) development transforms the centre from disjointed and enclosed retail or large format components to an active, integrated and compact built form;
- (r) development incorporates sustainable practices including maximising energy efficiency, and water conservation and encourages sustainable transport use;
- (s) development is oriented towards and activates the streets and pedestrian pathways and places that surround the centre; and
- (t) natural features are retained, enhanced and buffered from the impacts of development and any unavoidable impacts are minimised or mitigated.

#### **Oakey, Pittsworth, Crows Nest, Millmerran and Clifton Major Centres**

- (3) The overall outcomes for the major rural centres of Oakey, Pittsworth, Crows Nest, Millmerran and Clifton are:
  - (a) uses and activities service the needs of the residents and visitors of the major rural centres and the broader rural locality;
  - (b) residential development within the centre does not occur at a scale that compromises the ability of the centre to operate as a concentrated and vibrant commercial and community activity node;
  - (c) development contributes to the traditional character and heritage values of the streetscape; and
  - (d) large format shops and showrooms and car parking areas are located behind smaller active front buildings that front the main street and maintain the pedestrian scale and connectivity of the main street.

#### **Kearneys Spring Major Centre**

- (4) The overall outcomes for the Kearneys Spring major centre are:
  - (a) Uses and activities primarily serve the southern catchment of Toowoomba City and the Region;
  - (b) improve connectivity between Kearneys Spring and the University and the Principal Centre Zone by providing a public transport interchange within the centre;
  - (c) traditional retailing, community, entertainment and cultural activities are concentrated in the north of the centre, with bulky goods retail activities located in the south;
  - (d) supporting activities, such as commercial and residential development occur in association with the more intensive centre activities in the northern part of the centre, generally above ground and first floors;
  - (e) large community uses such as places of worship with large service catchments, are accommodated and located to enable more active centre activities to occur

- towards the external frontages of their sites and to integrate vehicle and pedestrian movement systems with surrounding centre activities;
- (f) development establishes active building frontages oriented to streets, repositions and integrates centre car parking behind the buildings, facilitates pedestrian connections within and external to the centre and improves the quality of the pedestrian environment; and
  - (g) community and entertainment uses are directed towards the major external movement networks and the internal pedestrian pathways and places.

#### Clifford Gardens Major Centre

- (5) The overall outcomes for the Clifford Gardens major centre are:
  - (a) Uses and activities support an established and growing population consolidated around the Clifford Gardens Shopping Centre and close to the Principal Centre Zone;
  - ~~(b) No substantial additional retail floor space is provided and large format bulky goods retail does not locate in this centre as the Clifford Gardens major centre has reached its ultimate size and position in the Region's network of centres;~~
  - ~~(e)~~(b) any new development in the centre assists in:
    - (i) increasing the mix of uses and re-orientating the centre towards the street;
    - (ii) supporting activity in the evenings and on weekends;
    - (iii) sleeving large, enclosed retail tenancies with a mix of retail, commercial and dining uses in smaller tenancies oriented towards the public realm;
    - (iv) improving connectivity between the north-western part of the centre (between Anzac Avenue and Westray Street) and the eastern part of the centre (located on Vacy and Princess Street);
    - (v) improving the visual and physical relationship between the Clifford Gardens Shopping Centre and the surrounding locality; and
    - (vi) facilitating pedestrian connections within and external to the centre and improving the quality of the pedestrian environment.

#### Wilsonton Major Centre Precinct

- (6) The overall outcomes for the Wilsonton major centre are:
  - (a) development accommodates additional retail and commercial uses to serve the western catchment of the Toowoomba Region, and accommodates additional retail and commercial development;
  - (b) establish a network of boulevards is along Richmond Drive, Tara Street and Fitzpatrick Street to contain the centre activities, define the main movement corridors through area and to enhance the amenity of adjoining residential areas;
  - (c) development improves pedestrian and cyclist accessibility and the quality of the pedestrian environment;
  - (d) development incorporates a mixed-use activity area between Erin and Tara Streets where development is oriented to the street and integrates with the existing park and residential development is integrated above street level; and
  - (e) community and entertainment uses are focused towards public spaces including town square and streets to encourage active uses that integrate with public realm and improve the quality of the pedestrian environment.

### 6.3.2.3 Criteria for assessment

**Table 6.3.2:1 – Major Centre Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| PO <sub>17</sub> Vehicular access does not impede the operational capacity, safety or efficiency of major roads.                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>AO<sub>17.1</sub> In Kearneys Spring, development does not provide new additional vehicular access points to Ruthven Street and Hume Street.</p> <p>AO<sub>17.2</sub> In Clifford Gardens, new additional vehicular access points are not provided to Anzac Avenue or James Street.</p> <p>AO<sub>17.3</sub> In the Wilsonton major centre new additional vehicular access points are not provided to Bridge Street and existing access point are not intensified.</p>                                                                                                                                                                                                                                                                                                                                   |
| <p>PO<sub>18</sub> Development facilitates an integrated and connected pedestrian and bicycle movement network in and around the area in accordance with Figures 6.3.2:1 - 3 – Kearneys Spring, Wilsonton and Clifford Gardens major centre concept diagrams) which provides:</p> <ul style="list-style-type: none"> <li>(a) access between all major elements of the centre;</li> <li>(b) gathering places for centre users positioned at regular intervals; and</li> <li>(c) a safe, convenient and legible circulation network.</li> </ul> | <p>AO<sub>18.1</sub> Pedestrian routes are a minimum of 5m wide.</p> <p>AO<sub>18.2</sub> In Wilsonton, connections are provided in the form of either new public roads or private but permanently publicly accessible roadways in private developments, and include:</p> <ul style="list-style-type: none"> <li>(a) the augmentation of Kirra Street between Tara Street and Richmond Drive;</li> <li>(b) the augmentation and realignment of Hooper Street between Tara Street and Richmond Drive;</li> <li>(c) a new north-south link through the centre from Sprott Street;</li> <li>(d) a new east-west link through the centre from the Sprott Street extension to Streten Park; and</li> <li>(e) opportunities for angle parking along Hooper Street to foster a 'main street' character.</li> </ul> |
| PO <sub>19</sub> Majority of car parking is provided at the rear of or under buildings.                                                                                                                                                                                                                                                                                                                                                                                                                                                       | No acceptable outcome is nominated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| PO <sub>20</sub> Development of individual sites occurs in a way that facilitates integration of access and parking across adjoining sites as they are progressively redeveloped.                                                                                                                                                                                                                                                                                                                                                             | No acceptable outcome is nominated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

### 6.3.3 District Centre Zone Code<sup>14</sup>

#### 6.3.3.1 Application

This code applies to assessable development:-

- (1) within the District Centre Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the District Centre Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.3.3.2 Purpose and overall outcomes

- (1) The purpose of the District Centre Zone Code is to provide for a mix of uses and activities.  
It includes a concentration of land uses including retail, commercial, residential, offices, administrative and health services, community, small scale entertainment and recreational facilities capable of servicing a district catchment. District centres are highly accessible and well connected to the catchment area and do not compromise the role and function of the Principal Centre or Major Centres .
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) development does not undermine the viability, role or function of the Principal Centre or Major Centres;
  - (b) the centre contains a mix of retail, commercial, administrative, community, cultural and entertainment activities capable of servicing the convenience and weekly retail, community and commercial needs of the district;
  - (c) district centres do not accommodate higher order retail facilities such as department stores and discount department stores;
  - (d) development is well-designed, incorporates public open spaces and is clustered around public and active transport facilities to promote public transport, walking and cycling;
  - (e) multiple dwellings and short-term accommodation are incorporated into centres as part of a mixed-use development at an appropriate scale and density of 30-40 dwellings per hectare; and integrate with and enhance the fabric of the centre;
  - (f) service industries that meet the needs of the catchment and do not adversely impact on the overall amenity or functionality of the district centre are located in the zone;
  - (g) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encouraging sustainable transport use;
  - (h) development provides a high level of amenity and is generally reflective of the surrounding character of the area. Building bulk, form and height may be more substantial than that of the surrounding residential buildings, but must include articulation and architectural elements which provide a pedestrian scale environment along streets;
  - (i) development maximises public transport accessibility and use and encourages walking and cycling;
  - (j) development has access to development infrastructure, including utility installations and essential services;
  - (k) natural features such as creeks, gullies, waterways, wetlands, habitats, vegetation and bushland are retained, enhanced and buffered from the impacts of adjacent uses and any unavoidable impacts are minimised through location, design, operation and management requirements.

#### Newtown District Centre Precinct

- (3) The overall outcomes for the Newtown district centre are:

<sup>14</sup> Amended on 3 November 2014

- (a) redevelopment and/or expansion of retail and commercial floor space occurs, consistent with the centre's convenience function and does not adversely impact on the role and function of Clifford Gardens Major Centre Zone;
- (b) medium density residential development adjoins the central retail area to enhance the diversity of use in the centre and to activate the centre at all hours;
- (c) development improves the centre legibility through integration and connectivity between individual buildings, car parking areas and the surrounding streets
- (d) the public realm is activated through ground floor development of shops, food and drink outlets and similar uses that encourage pedestrian activity;
- (e) development does not prejudice the continued operation of established community facilities, including the Glennie School;
- (f) boulevards are established along Herries Street and Anzac Avenue to define the main movement corridors through the area and to enhance the amenity of adjoining residential areas;
- (g) the function of Anzac Avenue as a major route through the city and an efficient public transport linkage to the city centre and key destinations throughout the Region is protected; and
- (h) additional cross block links, pedestrian connections and streetscape improvements are provided.

#### Glenvale District Centre Precinct

- (4) The overall outcomes for the Glenvale district centre are:
  - (a) retail and commercial development is provided commensurate with a demonstrated need as the district develops over time in a way that complements existing centre activities in the locality;
  - (b) development contributes to the provision of an integrated open space network following the Spring Creek riparian corridor; and
  - (c) boulevards are established along Glenvale Road and Greenwattle Streets to define the main movement corridors through the area and to enhance the amenity of adjoining residential areas.

### 6.3.3.3 Criteria for assessment

**Table 6.3.3:1 – District Centre Zone Code – for self assessable and assessable development**

| Performance outcomes      |                                                                                                                                                                                                                                                                                                                                                     | Acceptable outcomes |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| <b>The following apply to development within the Newtown District Centre</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                         |
| <p>PO<sub>14</sub> In the Newtown district centre, new development facilitates:</p> <ul style="list-style-type: none"> <li>(a) consolidation and framing of the established central retail core through the location and design of shops, business activities and food and drink outlets; and</li> <li>(b) the establishment of a mixed-use area in the western part of the centre predominantly accommodating community and residential uses.</li> </ul>                                                                                                                                          | <p>AO<sub>14.1</sub> New buildings and uses are located consistent with Figure 6.3.3:1 – Clifford Gardens Newtown District Centre Master Plan.</p>                                                                                                                                                                                                                      |
| <p>PO<sub>15</sub> In the Newtown district centre, development near the edge of the centre is oriented to, and activates, Hill Street, Anzac Avenue and Herries Streets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>AO<sub>15.1</sub> Active frontages developed with shops, restaurants, offices (where providing a service with direct interaction with the public, such as banks and real estate agents) and other similar uses are provided along the ground floor of Hill Street, Anzac Avenue and Herries Street, and residential and office uses are located on upper floors.</p> |
| <p>PO<sub>16</sub> Servicing areas and main car parking areas are located behind buildings, with some short-term parking provision along the Hill Street frontage.</p>                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>No acceptable outcome is nominated.</p>                                                                                                                                                                                                                                                                                                                              |
| <p>PO<sub>17</sub> In the Newtown district centre, development adjacent to a road identified as having a boulevard treatment contributes to the establishment of a boulevard character for the roads through:</p> <ul style="list-style-type: none"> <li>(a) deep planting of large trees in generous building setbacks; and</li> <li>(b) maintaining a visually open area on private property adjoining the road and avoiding the construction of high solid front fences.</li> </ul>                                                                                                             | <p>AO<sub>17.1</sub> Landscaping along the street frontage includes at least one (1) large shade tree for every 20m of frontage width.</p> <p>AO<sub>17.2</sub> Fencing within the setback area is transparent over at least 50% of its surface area.</p>                                                                                                               |
| <p>PO<sub>18</sub> In the Newtown district centre:</p> <ul style="list-style-type: none"> <li>(a) new pedestrian spines are established on a north to south and east to west grid, to connect new and existing buildings and traverse open car parking areas;</li> <li>(b) small scale public spaces, landscaped with street furniture and shade structures, are created in locations adjacent to existing and new retail and commercial uses; and</li> <li>(c) a designated pedestrian plaza is provided centrally in the central retail core to provide a focal point for the centre.</li> </ul> | <p>AO<sub>18.1</sub> Pedestrian spines, small scale public spaces and a pedestrian plaza are established generally consistent with Figure 6.3.3:1 – Clifford Gardens Newtown District Centre Master Plan.</p>                                                                                                                                                           |

## 6.3.4 Local Centre Zone Code<sup>17</sup>

### 6.3.4.1 Application

This code applies to assessable development:-

- (1) within the Local Centre Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Local Centre Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.3.4.2 Purpose and overall outcome

- (1) The purpose of the zone is to provide for a limited range of retails, commercial and community activities to service local needs.  
It includes local shopping, local employment nodes, commercial, cafes and dining, entertainment, community services and residential development where it can integrate with and enhance the fabric of the activity centre. Uses do not compromise the role and function of higher order centres. .
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) development does not undermine the viability, role or function of higher order centres;
  - (b) a range of convenience retail, and small scale commercial and community uses are provided which meet the local convenience needs of the immediate surrounding population including those of smaller rural towns;
  - (c) development is reflective of and responsive to the environmental constraints of the land;
  - (d) residential development and short-term accommodation is provided where it can integrate and enhance the fabric of the activity centre, but it is not the predominant use and should not compromise the ability for non-residential uses to be concentrated in the centre or limit activities at street level;
  - (e) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (f) development provides a high level of amenity and is reflective of the surrounding character of the area;
  - (g) development encourages public and passenger transport accessibility and use of walking and cycling;
  - (h) development has access to development infrastructure, including utility installations and essential services; and
  - (i) natural features are retained, enhanced and buffered from the impacts of adjacent uses and any unavoidable impacts are minimised through location, design, operation and management requirements.

<sup>17</sup> Amended on 3 November 2014

### 6.3.4.3 Criteria for assessment

**Table 6.3.4:1 – Local Centre Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                    | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| PO <sub>14</sub> Development is designed to incorporate graffiti-prevention measures.                                                                                                                                                                                                                                                                                                                                                                                                                   | AO <sub>14.1</sub> Building design and layout incorporates the following features where practical:<br>(a) shrubbery planted against walls;<br>(b) designs with an absence of 'natural ladders';<br>(c) minimal unbroken vertical surface areas; and<br>(d) graffiti-deterrent surface treatments. |

## 6.4 Recreation Zones Category

### 6.4.1 Sport and Recreation Zone Code<sup>20</sup>

#### 6.4.1.1 Application

This code applies to assessable development:-

- (1) within the Sport and Recreation Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Sport and Recreation Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.4.1.2 Purpose and overall outcomes

- (1) The purpose of the Sport and Recreation Zone Code is to provide for a range of organised activities that includes sport, cultural and educational activities where the uses require a level of built infrastructure.

It includes structures, such as clubhouses, gymnasiums, public swimming pools, tennis courts, and infrastructure to support recreational and sporting activities and meet community needs.

The code recognises the importance of recreation and open space areas to community liveability and to facilitate the effective operation and optimum accessibility of sport and recreation activities.

- (2) The overall outcomes sought for the zone code are as follows:
  - (a) areas available for active sport and recreational pursuit such as playing fields, equestrian facilities, outdoor cultural facilities, educational activities, public swimming pools and outdoor courts are provided;
  - (b) opportunities for sporting clubs using playing fields to establish club facilities are facilitated;
  - (c) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (d) impacts on adjacent areas from development and activities within the zone are managed through buffering to adjacent sensitive land uses and appropriate design, siting and operation of facilities and infrastructure;
  - (e) ancillary structures and buildings such as clubhouses, kiosks, shelters, stands, amenity facilities, picnic tables and playgrounds are provided where necessary;
  - (f) areas of ecological significance, high scenic amenity or cultural heritage are protected from the adverse impacts of sport and recreation activities;
  - (g) adverse impacts on ecological values are minimised where recreation and open spaces areas include natural habitats such as bushland, wetlands or waterways, or act as a buffer between natural and developed areas; and
  - (h) walking and cycling to recreation and open space areas is encouraged through the provision of paths to, and where appropriate through, the space, and by providing adequate end-of-trip facilities such as secure bicycle parking and water fountains.

## 6.4.2 Open Space Zone Code<sup>21</sup>

### 6.4.2.1 Application

This code applies to assessable development:-

- (1) within the Open Space Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Open Space Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.4.2.2 Purpose and overall outcomes

- (1) The purpose of the Open Space Zone is to provide for local, district and regional scale parks that serve the recreational needs of a wide range of residents and visitors.

Where required to meet community needs, development may include shelters, amenity facilities, picnic tables, and playgrounds and infrastructure to support safe access and essential management.

The code recognises the importance of recreation and open space areas to community liveability and to facilitate the optimum accessibility of open space networks.

- (2) The overall outcomes sought for the zone code are as follows:
  - (a) open space is accessible to the general public for a range of outdoor activities;
  - (b) a range of functional and accessible open spaces, including local, district and regional scale parks and linkages is available for the use and enjoyment of residents and visitors;
  - (c) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encouraging sustainable transport use;
  - (d) ancillary structures and buildings such as shelters, amenity facilities, picnic tables and playgrounds are provided where necessary;
  - (e) clubhouses and kiosks are located in this zone only where impacts on sensitive land uses (such as accommodation activities) and the values of the open space can be protected;
  - (f) land which is susceptible to flooding or drainage problems, including high ground water tables, is protected from inappropriate activities or facilities;
  - (g) where open space areas include natural habitats such as bushland, wetlands or waterways, or act as a buffer between natural and developed areas, adverse impacts on ecological values are minimised;
  - (h) the use of open space areas does not negatively affect the amenity of adjacent areas, particularly residential areas; and
  - (i) the type and form of development enhances one or more informal open space values, that is, recreational, visual, cultural, sporting or biodiversity.
  - (j) Walking and cycling to open spaces is encouraged through the provision of paths to, and where appropriate through, the space, and by providing adequate end-of-trip facilities such as places to secure a bicycle and water fountains.

#### State Government Conservation and Forestry Precinct

- (3) The overall outcome for the State Government Conservation and Forestry Precinct within the Open Space Zone is as follows:
  - (k) The use of land is managed in accordance with the State legislation which governs the particular tenure of land, e.g., *Forestry Act 1959*, *Nature Conservation Act 1992*, *Recreation Areas Management Act 2006*.

<sup>21</sup> Amended on 3 November 2014

### 6.4.2.3 Criteria for assessment

**Table 6.4.2:1 – Open Space Zone Code – for self assessable and assessable development**

| PO <sub>8</sub> Site layout facilitates the security of people and property having regard to:<br>(a) opportunities for casual surveillance and sightlines;<br>(b) exterior building designs which promote safety;<br>(c) adequate definition of uses and ownership;<br>(d) adequate lighting;<br>(e) appropriate way-finding mechanisms (e.g. signage);<br>(f) minimisation of entrapment locations; and<br>(g) building entrances, loading and storage areas being well lit and lockable after hours. | No acceptable outcome is nominated.                                                                                                                                                                                                                                                              |
| PO <sub>9</sub> Development is designed to incorporate graffiti-prevention measures.                                                                                                                                                                                                                                                                                                                                                                                                                   | AO <sub>9.1</sub> Building design and layout incorporates the following features where practical:<br>(a) shrubbery planted against walls;<br>(b) designs with an absence of 'natural ladders';<br>(c) minimal unbroken vertical surface areas; and<br>(d) graffiti-deterrent surface treatments. |
| PO <sub>10</sub> Development maintains a high level of amenity within the site and for surrounding areas, having regard to noise, odour, lighting, access to sunlight, privacy and outlook.                                                                                                                                                                                                                                                                                                            | No acceptable outcome is nominated.                                                                                                                                                                                                                                                              |

## 6.5 Industry Zones Category

### 6.5.1 Low Impact Industry Zone Code<sup>22</sup>

#### 6.5.1.1 Application

This code applies to assessable development:-

- (1) within the Low Impact Industry Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Low Impact Industry Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.5.1.2 Purpose and overall outcomes

- (1) The purpose of the Low Impact Industry Zone Code is to provide for service and low impact industry uses.  
It may include non-industrial and business uses that support the industrial activities where they do not compromise the long term use of the land for industrial purposes.  
Activities considered appropriate in this zone are defined as low impact industry or service industry in the schedule of definitions.  
The limited supply of land within this zone is not taken up by industrial or industry related uses that are able to be accommodated in other locations. The zone is protected from encroachment by incompatible land uses.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) a range of industrial uses that satisfy the intent of the zone will be facilitated;
  - (b) non-industrial uses, such as Food and Drink Outlets and Service Stations which directly support the industrial area are facilitated and accessible by walking and cycling;
  - (c) recreation and entertainment uses, such as Indoor Sport and Recreation, Major Sport, Recreation and Entertainment Facilities and Motor Sport Facility that require buffering from sensitive land uses and do not compromise the use of surrounding land for industrial purposes are facilitated;
  - (d) the following commercial uses that involve the sale of bulk items, require large outdoor storage and display areas and have the potential for adverse impacts due to odour and/or dust, are facilitated:
    - (i) Agricultural Supplies Stores.
    - (ii) Bulk Landscape Supplies.
    - (iii) Garden Centres.
    - (iv) Hardware and Trade Supplies.
    - (v) Outdoor Sales.
    - (vi) Wholesale Nurseries.
  - (e) offices and direct sales are only established where ancillary to an industrial activity on the site;
  - (f) development is located, designed and managed to maintain safety to people, avoid significant adverse effects on the natural environment and minimise impacts on adjacent non-industrial land;
  - (g) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (h) development is reflective of and responsive to the environmental constraints of the land;

<sup>22</sup> Amended on 3 November 2014

- (i) the scale, character and built form of development contribute to a high standard of amenity;
- (j) development has access to development infrastructure, including utility installations and essential services;
- (k) the viability of both existing and future industry uses is protected from the intrusion of incompatible uses;
- (l) adverse impacts on natural features and processes both on-site and on adjoining areas are minimised through location, design, operation and management of development; and
- (m) development is adequately separated from accommodation activities and other sensitive land uses to minimise the likelihood of environmental harm and/or environmental nuisance occurring.

### 6.5.1.3 Criteria for assessment

**Table 6.5.1.1 – Low Impact Industry Zone Code– for self assessable and assessable development**

| Performance outcomes      |                                                                                                                                                                                                                                                                                                  | Acceptable outcomes |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## 6.5.2 Medium Impact Industry Zone Code<sup>27</sup>

### 6.5.2.1 Application

This code applies to assessable development:-

- (1) within the Medium Impact Industry Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Medium Impact Industry Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.5.2.2 Purpose and overall outcomes

- (1) The purpose of the Medium Impact Industry Zone Code is to provide for medium impact industry uses:
  - (a) it may include non-industrial and business uses that support the industrial activities where they do not compromise the long-term use of the land for industrial purposes; and
  - (b) activities considered appropriate in this zone are defined as Medium Impact Industry in the schedule of definitions.

The limited supply of land within this zone is not taken up by industrial or industry related uses that are able to be accommodated in other locations and that it is protected from encroachment by incompatible land uses.

- (2) The overall outcomes sought for the zone code are as follows:
  - (a) a range of industrial uses that satisfies the intent of the zone will be facilitated;
  - (b) residential uses are not located within close proximity to the industrial uses and activities in the zone;
  - (c) high impact industry and rural industry uses may be appropriate where off-site impacts from these uses can be mitigated or managed and where they comply with separation distances to minimise impacts on sensitive land uses;
  - (c) the following commercial uses that involve the sale of bulk items, require large outdoor storage and display areas and have the potential for adverse impacts due to odour and/or dust, are facilitated:
    - (i) Agricultural Supplies Stores.
    - (ii) Bulk Landscape Supplies.
    - (iii) Garden Centres.
    - (iv) Hardware and Trade Supplies.
    - (v) Outdoor Sales.
    - (vi) Wholesale Nurseries.
  - (d) non-industrial uses, such as Food and Drink Outlets and Service Stations which directly support the industrial area are facilitated and accessible by walking and cycling;
  - (e) offices and direct sales are only established where ancillary to an industrial activity on the site;
  - (f) development is located, designed and managed to maintain safety to people, avoid significant adverse effects on the natural environment and minimise impacts on nearby non-industrial land uses;
  - (g) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (h) development is reflective of and responsive to the environmental constraints of the land;

<sup>27</sup> Amended on 3 November 2014

- (i) the scale, character and built form of development contributes to a high standard of amenity;
- (j) development has access to development infrastructure, including utility installations and essential services;
- (k) the viability of both existing and future industry uses are protected from the intrusion of incompatible uses;
- (l) adverse impacts on natural features and processes, both on-site and on adjoining areas, are minimised through location, design, operation and management of development; and
- (m) development is adequately separated from sensitive land uses to minimise the likelihood of environmental harm or environmental nuisance occurring.

### 6.5.2.3 Criteria for assessment

**Table 6.5.2:1 – Medium Impact Industry Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                  | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| <p>PO<sub>16</sub> A variety of building materials, textures and colours, building elements, articulation and landscaping are used to provide visual interest.</p> <p><b>Building Form Legibility</b></p>  <p><b>Appropriate Building Forms</b></p>  <p><b>Inappropriate Building Forms</b></p>  | <p>AO<sub>16.1</sub> The unarticulated length of external walls does not exceed 15m where:</p> <ul style="list-style-type: none"> <li>(a) facing a road frontage; or</li> <li>(b) visible from a residential area or public open spaces.</li> </ul> <p>Development achieves articulation through the use of variation in textures, colours, finishes and landscaping.</p> <p>AO<sub>16.2</sub> Variation of building form and elevation is appropriate to the building's internal function.</p> |

### 6.5.3 High Impact Industry Zone Code<sup>32</sup>

#### 6.5.3.1 Application

This code applies to assessable development:-

- (1) within the High Impact Industry Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the High Impact Industry Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.5.3.2 Purpose and overall outcomes

- (1) The purpose of the High Impact Industry Zone Code is to provide for high impact industry uses:
  - (a) it may include non-industrial and business uses that support the industrial activities where they do not compromise the long-term use of the land for industrial purposes; and
  - (b) activities considered appropriate in this zone are defined as High Impact Industry in the schedule of definitions.

The limited supply of land within this zone is not taken up by industrial or industry related uses that are able to be accommodated in other locations and that it is protected from encroachment by incompatible land uses.

- (2) The overall outcomes sought for the zone code are as follows:
  - (a) a range of industrial uses that satisfy the intent of the zone will be facilitated;
  - (b) residential uses are not located within close proximity to the industrial uses and activities in the zone;
  - (c) Medium Impact Industry and rural industry uses may be appropriate where they are not detrimentally affected by or compromise the operations of High Impact Industry uses;
  - (d) offices and direct sales are only established where ancillary to an industrial activity on the site;
  - (e) development is located, designed and managed to maintain safety to people, avoid significant adverse effects on the natural environment and minimise impacts on adjacent non-industrial land;
  - (f) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (g) development is reflective of and responsive to the environmental constraints of the land;
  - (h) the scale, character and built form of development contributes to a high standard of amenity;
  - (i) development has access to development infrastructure, including utility installations and essential services;
  - (j) the viability of both existing and future industry uses are protected from the intrusion of incompatible uses;
  - (k) adverse impacts on natural features and processes both on-site and on adjoining areas are minimised through location, design, operation and management of development; and
  - (l) development is adequately separated from sensitive land uses to minimise the likelihood of environmental harm or environmental nuisance occurring.

## 6.6 Other Zones Category

### 6.6.1 Community Facilities Zone Code<sup>37</sup>

#### 6.6.1.1 Application

This code applies to assessable development:-

- (1) within the Community Facilities Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Community Facilities Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.6.1.2 Purpose and overall outcomes

- (1) The purpose of the Community Facilities Zone Code is to provide for community related activities and facilities whether under public or private ownership. These may include provision of municipal services, public utilities, government installations, hospitals and schools, transport and telecommunication networks and community infrastructure of an artistic, social or cultural nature.  
The zone facilitates the effective operation and optimum accessibility of community related activities.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) development is located in highly accessible locations and is sympathetic in scale, height and bulk with that of surrounding developments or designed to ensure that where of a greater scale, height and bulk to surrounding development the visual impacts are addressed through the use of setbacks, building form, landscaping and other means;
  - (b) development provides opportunities for co-location of community activities to create identifiable community nodes;
  - (c) development is integrated with surrounding land uses through permeable and legible connections;
  - (d) land within the zone remains available to accommodate community related activities;
  - (e) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (f) uses and works are located, designed and managed to avoid significant adverse effects on the natural environment and minimise impacts on adjacent land;
  - (g) adverse impacts on natural features and processes, both on-site and on adjoining areas, are avoided and any unavoidable impacts are minimised through location, design, operation and management of development;
  - (h) development will be provided with a level of development infrastructure, including utility installations that is appropriate to the use; and
  - (i) development is designed to consider CPTED principles and encourage public transport accessibility and active transport modes of walking and cycling.

##### Education Precinct

- (3) The overall outcome of the Education Precinct within the Community Facilities Zone is that:
  - (a) the primary use of the land is for educational establishment and related ancillary purposes including staff and student accommodation.

##### Higher Education Precinct

- (4) The overall outcome of the Higher Education Precinct within the Community Facilities Zone is that:

<sup>37</sup> Amended on 3 November 2014

- (a) the primary use of the land is for higher education and related purposes, including staff and student accommodation, limited convenience retailing, entertainment and community activities that support students and employees;
- (b) the built form of the development is primarily a garden campus style with landscaped spaces provided between buildings;
- (c) the built form of the development may be of a higher intensity than that in surrounding zones in recognition of the function and particular operational aspects of development; and
- (d) development is designed to encourage public transport accessibility and active transport modes of walking and cycling.

#### **Hospital Precinct**

- (5) The overall outcome of the Hospital Precinct within the Community Facilities Zone is that:
  - (a) the primary use of the land is for hospital and allied health uses, including education and research uses, staff accommodation, and limited convenience retailing and community uses that support employees and visitors;
  - (b) the built form of the development is a garden campus style with buildings up to 6 storeys in height that open onto courtyards;
  - (c) development is designed to provide clear legibility within the precinct and to identify points of arrival/destination at key public areas of the hospital; and
  - (d) development is designed to encourage public transport accessibility and active transport modes of walking and cycling.

#### **Government Precinct**

- (6) The overall outcome of the Government Precinct within the Community Facilities Zone is that:
  - (a) the primary use of land is for special uses and works that are owned or operated by Federal, State or Local Government, which may include municipal services, public utilities, community facilities and transport networks;
  - (b) the form of the development is specific to the facility in recognition of particular operational, functional and locational criteria of government functions; and
  - (c) the viability of government related facilities is protected by excluding development that may prejudice the on-going operation and expansion of existing uses or the development of new facilities.

#### **Other Community Purposes Precinct**

- (7) The overall outcome of Other Community Purposes Precinct within the Community Facilities Zone is that:
  - (a) the primary use of land is for community purposes where the land is not in government ownership. This includes Community Uses (e.g., community halls, museums and art galleries) Cemeteries, Outdoor Sport and Recreation or Major Sports and Recreation facilities (e.g., showgrounds) and works associated with these activities; and
  - (b) the viability of community purpose facilities is protected by excluding development that may prejudice the on-going operation and expansion of existing uses or the development of new facilities.

### 6.6.1.3 Criteria for assessment

**Table 6.6.1:1 – Community Facilities Zone – for self assessable and assessable development**

| Performance outcomes |                                                                                                                                                                          | Acceptable outcomes |                                                                                                                                                                                                                                                                                                                   |

## 6.6.2 Emerging Community Zone Code<sup>38</sup>

### 6.6.2.1 Application

This code applies to assessable development:-

- (1) within the Emerging Community Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Emerging Community Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.2.2 Purpose and overall outcomes

- (1) The purpose of the Emerging Community Zone Code is to:
  - (a) identify land that is suitable for urban purposes and protect land that may be suitable for urban development in the future;
  - (b) manage the timely conversion of non-urban land to urban purposes; and
  - (c) prevent or discourage development that is likely to compromise appropriate longer term land use.
- (2) Future development in the Emerging Community Zone:
  - (a) creates an integrated and compact urban form;
  - (b) establishes safe, attractive and walkable communities ;
  - (c) provides for a wide choice of housing and accessible community services; and
  - (d) avoids areas within the Emerging Community Zone that are unsuited to urban development because of their natural, scenic or cultural values.

Any development which occurs in the interim maintains the suitability and capacity for future urban development of a predominantly residential nature.
- (3) The overall outcomes sought for the zone code are as follows:
  - (a) master planning of areas within the zone is undertaken in advance of, or in parallel with, proposals to develop land for urban purposes;
  - (b) land is developed in a logical pattern that facilitates the efficient provision of infrastructure;
  - (c) a high level of integration with existing and future urban development is achieved having regard to movement networks, open space and recreational facilities, centres and community infrastructure;
  - (d) urban development provides for a range of housing types and achieves a minimum dwelling yield of 15 dwellings per hectare net ;
  - (e) movement networks are established to promote active transport (walking and cycling) and public transport;
  - (f) development retains and protects significant environmental, topographic, scenic and cultural features and values;
  - (g) development provides for sufficient buffering to existing or intended non urban or incompatible uses in surrounding areas; and
  - (h) development which is, or has the potential to become, incompatible with future urban development of the area does not occur.

| PO <sub>4</sub>               | Development does not unduly impact on the amenity, character or other values of the locality, having regard to: <ul style="list-style-type: none"> <li>(a) the scale, siting and design of buildings and structures;</li> <li>(b) visibility from roads and other public view points, screening vegetation and landscaping;</li> <li>(c) the natural landform and avoidance of visual scarring; and</li> <li>(d) noise, odour and other emissions.</li> </ul>                                                                                                                                                                                          | No acceptable outcome is nominated. |
| PO <sub>5</sub>               | The site layout responds sensitively to on-site and surrounding topography, drainage patterns, utility services, access, vegetation and adjoining land uses, such that: <ul style="list-style-type: none"> <li>(a) any hazards to people or property are avoided;</li> <li>(b) any earthworks are minimised;</li> <li>(c) the retention of natural drainage lines is maximised;</li> <li>(d) the retention of existing vegetation is maximised;</li> <li>(e) damage or disruption to sewer, stormwater and water infrastructure is avoided; and</li> <li>(f) there is adequate buffering, screening or separation to adjoining development.</li> </ul> | No acceptable outcome is nominated. |
| PO <sub>6</sub>               | Roads and other infrastructure are of a sufficient capacity to accommodate the demands generated by the development.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | No acceptable outcome is nominated. |

### 6.6.3 Extractive Industry Zone Code<sup>41</sup>

#### 6.6.3.1 Application

This code applies to assessable development:-

- (1) within the Extractive Industry Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Extractive Industry Zone Code by the tables of assessment in Part 5 (Tables of assessment).

#### 6.6.3.2 Purpose and overall outcomes

- (1) The purpose of the Extractive Industry Zone Code is to provide for the extraction and/or processing of natural resources such as sand, gravel, quarry rock, clay and soil.  
Development such as the storage, processing, treatment and transportation facilities may be provided in the Extractive Industry Zone where such development is ancillary to the extractive.  
Key Resource Areas under the State Planning Policy December 2013, within the Region are protected from inappropriate development and are protected for future development optimal utilisation of the resource.
- (2) The purpose of the zone will be achieved through the following overall outcomes:
  - (a) the establishment of extractive industry operations is facilitated, provided that the significant environmental impacts of such operations are contained within the site;
  - (b) an effective buffer is maintained between extractive industry operations and existing and future sensitive land uses;
  - (c) development is located, designed and managed to maintain safety to people, avoid significant adverse effects on the natural environment and minimise impacts on adjacent non-industrial land;
  - (d) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (e) development is reflective of and responsive to the environmental constraints of the land;
  - (f) development has access to development infrastructure, including utility installations and essential services;
  - (g) the viability of existing and future industrial uses and operations are protected from the intrusion of incompatible uses; and
  - (h) development for an extractive industry provides for the progressive rehabilitation of the premises.

<sup>41</sup> Amended on 3 November 2014

### 6.6.3.3 Criteria for assessment

**Table 6.6.3:1 – Extractive Industry Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                  | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| PO <sub>1</sub>        | The zone accommodates extractive industry and only those activities that are compatible with the extractive operation.                                                                                                                                                                                                                                                           | AO <sub>1.1</sub>                   | Uses which are consistent with the intent of the zone include:<br>(a) caretaker's accommodation;<br>(b) animal husbandry;<br>(c) cropping;<br>(d) extractive industry;<br>(e) landing;<br>(f) major electricity infrastructure; and<br>(g) substation.                            |
|                        |                                                                                                                                                                                                                                                                                                                                                                                  | AO <sub>1.2</sub>                   | Uses which are inconsistent with the intent of the zone include:<br>(a) accommodation activities (other than caretakers accommodation);<br>(b) business activities;<br>(c) entertainment activities;<br>(d) market;<br>(e) recreation activities; and<br>(f) industry activities. |
| PO <sub>2</sub>        | Development other than extractive industry does not reduce or preclude the potential for extractive operations on the land.                                                                                                                                                                                                                                                      | No acceptable outcome is nominated. |                                                                                                                                                                                                                                                                                   |
| Effects of development |                                                                                                                                                                                                                                                                                                                                                                                  |                                     |                                                                                                                                                                                                                                                                                   |
| PO <sub>3</sub>        | Extractive industries are separated from sensitive land uses to avoid potential for nuisance or complaint.                                                                                                                                                                                                                                                                       | AO <sub>3.1</sub>                   | The resource/processing area is surrounded by the separation area set out in the State Planning Policy.                                                                                                                                                                           |
| PO <sub>4</sub>        | The design, operation and staging of the extractive industry use:<br>(a) promotes the efficient extraction of economic resources;<br>(b) minimises vibration, noise, dust, lighting and other impacts on the surrounding area;<br>(c) protects the natural environment; and<br>(d) results in optimal future land use and land form after extraction is completed. <sup>42</sup> | No acceptable outcome is nominated. |                                                                                                                                                                                                                                                                                   |

<sup>42</sup> Demonstration of compliance with PO<sub>3</sub> is likely to require the submission of reports, prepared by suitably qualified persons, that include:

- survey drawings of the existing site and plans showing the proposed staging of extraction and rehabilitation and development in stages of on-site access, operational infrastructure, stockpiling areas, other storage and servicing areas and water management;
- geological and geotechnical information about the resource, and description and evaluation of alternatives considered for the exploitation of the resource;
- specification of all machinery, including vehicles, intended to be employed on the site;
- an evaluation of the need for the development, including markets and proposed rates of extraction;
- plans for progressive planting and site rehabilitation, including demonstration of visual impact over time;
- proposed methods of removing material or refuse from the site; and

| <b>Haulage</b>                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| PO <sub>6</sub> The transportation of materials from the site occurs with minimal impacts upon the environment, the road system and premises along the haulage route.             | AO <sub>6.1</sub> The development has road access that: <ul style="list-style-type: none"> <li>(a) is of a standard sufficient to carry traffic of the nature that the extractive industry use would be likely to generate;</li> <li>(b) does not cause adverse impacts on the premises along the haulage route, in particular due to the effects of dust and noise; and</li> <li>(c) does not compromise traffic safety in the area.</li> </ul> |

(g) an Environmental Management Plan that addresses all issues relevant to the performance outcome.

## 6.6.4 Limited Development (Constrained Land) Zone Code<sup>43</sup>

### 6.6.4.1 Application

This code applies to assessable development:-

- (1) within the Limited Development (Constrained Land) Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Limited Development (Constrained Land) Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.4.2 Purpose and overall outcomes

- (1) The purpose of the zone is to identify land known to be significantly affected by one or more development constraints (such as past or future mining activities, flooding, land contamination, defence requirements, historical subdivisions and buffer areas). Such constraints pose severe restrictions on the ability of the land to be developed for urban purposes.

This zone identifies and limits development within land that is unsuitable for further development as a result of:

- (a) multiple environmental development constraints (such as slope and soil stability, significant vegetation and bushfire); and
  - (b) historic subdivisions which are remote, lack urban services or are otherwise unsuitable for additional development.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) the limited potential for development restricts the number and type of land uses that can occur;
  - (b) new uses, buildings/structures and works reflect a low intensity non-urban nature and are provided with an appropriate level of infrastructure and access;
  - (c) where development is proposed, it is of a low intensity and scale and is reflective and responsive to the environmental development constraints of the land (such as slope and soil stability, significant vegetation and bushfire); and
  - (d) adverse impacts of land use, both on-site and on adjoining areas, are avoided and any unavoidable impacts are minimised through location, design, operation and management.

### 6.6.4.3 Criteria for assessment

**Table 6.6.4:1 – Limited Development (Constrained Land) Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                      | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                 |

## 6.6.5 Mixed Use Zone Code<sup>46</sup>

### 6.6.5.1 Application

This code applies to assessable development:-

- (1) within the Mixed Use Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Mixed Use Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.5.2 Purpose and overall outcomes

- (1) The purpose of the zone is to provide a mixture of development including service industry, business, retail, residential and Low Impact Industrial uses.  
In addition the code aims to:
  - (a) facilitate development that provides a compact urban form;
  - (b) encourage development that contributes to the 'green city image' and integrates with open space and major pedestrian links between the principal centre and surrounding localities;
  - (c) ensure building height, scale and density assists in the realisation of compact and sustainable development, without compromising the primacy of the principal centre;
  - (d) facilitate a mix of uses that increases the intensity and diversity of activity within the zone;
  - (e) promote a mix of employment opportunities;
  - (f) facilitate development that activates street frontages where appropriate;
  - (g) promotes safe and efficient public transport use, walking and cycling;
  - (h) ensure new development complements and preserves existing heritage and character of Toowoomba City; and
  - (i) provide residential development at an appropriate scale and integrated with the other uses in the zone.
- (2) The overall outcomes sought for the zone code are as follows<sup>47</sup>:
  - (a) a mix of uses and activities which support and do not compromise the role and function of the principal centre and which include retail uses that serve a local need, commercial, tourism, industry and residential uses that are provided in accordance with the particular intent for each precinct where applicable;
  - (b) shops (being department stores, discount department stores, discount variety stores or other shops of similar scale) and large scale shopping centres are not located within the Mixed Use Zone;
  - (c) service industries and low impact industries which that have a high standard of building presentation and clean operation are facilitated within the zone;
  - (d) a variety of development types and forms are facilitated including a mix of uses vertically integrated within buildings, and single uses mixed horizontally throughout the zone;
  - (e) a diversity of building types that contribute to a high standard of amenity through appropriate scale, character and built form;
  - (f) building setbacks to street frontages clearly define streetscape and provide an improved quality of streetscape generally;
  - (g) development at 'gateway' or key entry locations includes landmark buildings with a public realm that makes a positive contribution to the legibility and urban structure of the surrounding area;
  - (h) development is designed to incorporate sustainable practices;

<sup>46</sup> Amended on 3 November 2014

<sup>47</sup> The code within the University District Local Plan also has specific provisions relating to mixed use development.

- (i) development is designed to engage with the street level where appropriate through land use and built form responses;
  - (j) development is reflective of and responsive to the environmental features of the land; and
  - (k) development has access to development infrastructure including utility installations and essential services.
- (3) The purpose of the Mixed Use Zone will further be achieved through the following overall outcomes for particular precincts:

**Parkland Living Precinct**

- (a) The precinct includes predominantly residential and commercial uses, with residential uses capitalising on the amenity and north facing orientation of sites overlooking East Creek and Queens Park.
- (b) Development provides improved east west pedestrian connections through the precinct.

**City South Precinct**

- (a) The precinct provides employment and residential opportunities which benefit from their proximity to the Principal Centre Zone and other surrounding precincts.
- (b) The precinct includes a range of bulky goods/showrooms, service industry, commercial and residential uses.
- (c) The precinct is an employment hub which includes commercial development and the consolidation and intensification of service industry and bulky goods/showroom uses.
- (d) High exposure sites are developed for predominantly commercial uses that support the surrounding precincts.
- (e) Development capitalises on the amenity and landscape of St Luke's churchyard;
- (f) Development provides improved pedestrian connections through the precinct.

**West Creek Precinct**

- (a) The precinct is an employment hub which consolidates and intensifies service industries, low impact industry and bulky goods/showrooms.
- (b) Development capitalises on the amenity and proximity of sites overlooking west creek and activates the corridor edges.
- (c) Development provides improved pedestrian connections through the precinct.
- (d) Different forms of residential development offer a range of accommodation.
- (e) Development provides for strong pedestrian connections and safe crossing points between built form and green spaces (including a network of bridges and paths).
- (f) High quality streetscape treatment is provided at the interface of the precinct with the Principal Centre Zone.

**Railyards Precinct**

- (a) The precinct is to develop as an 'urban village' being an integrated and master-planned urban environment, incorporating a mix of uses such as:
  - (i) residential uses, including affordable housing and short-term accommodation;
  - (ii) a mixed use convenience centre, incorporating a supermarket and supporting shops and commercial uses such as food and drink outlets and offices; and
  - (iii) community facilities such as child care centres, medical centres and indoor sport and recreation that are facilitated within the parkland area.
- (b) Development includes a range of high quality residential housing types.
- (c) Uses within the precinct are complementary to the uses in the adjacent Principal Centre Zone and do not compete with the primacy of the principal centre.
- (d) Development maximises access to and integration with the open space area of the precinct.

- (e) Development is sited to create a number of view corridors or green wedges that extend from the open space to Ruthven Street and Bellevue Street.
- (f) Development includes active streets and spaces which integrate with the open space areas.
- (g) Development includes a high quality streetscape and public open space network that comprises continuous/linked public spaces and parks that are designed to be safe, comfortable and well landscaped.
- (h) Development provides improved pedestrian connections through the precinct.
- (i) Development includes the adaptive reuse of heritage buildings for community or low level commercial operations.
- (j) Development on the foundry site provides for a diverse range of housing types integrated with local shops and food and drink outlets.
- (k) Development on the gasworks site provides for residential development.
- (l) Development is designed to incorporate contemporary architecture which responds sensitively to nearby heritage values and features.
- (m) Development provides a grid network of streets.
- (n) Parking is concealed in basements or in the centre of development blocks areas do not dominate the precinct and open space.

#### Health Support Precinct

- (a) The precinct provides for uses that support or are aligned with the Toowoomba Hospital, such as health care services, shops and food and drink outlets.
- (b) The precinct provides a range of housing types such as short-term accommodation.
- (c) Development capitalises on the amenity of sites overlooking West Creek to provide integrative opportunities.
- (d) Development provides improved pedestrian connections through the precinct.

#### 6.6.5.3 Criteria for assessment

Table 6.6.5:1 – Mixed Use Zone Code – for self assessable and assessable development

| Performance outcomes                                                                                                                                                                                | Acceptable outcomes                                                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Non-residential uses – Scale of use</b>                                                                                                                                                          |                                                                                                                                                                                                                                                           |
| PO <sub>1</sub> The non-residential use is of a scale and intensity that is compatible with the character of the streetscape and the residential appearance of the locality.                        | AO <sub>1.1</sub> The use: <ul style="list-style-type: none"> <li>(a) is carried out in an existing building; and</li> <li>(b) <del>only does not</del> increases the Gross Floor Area of the building <u>by a maximum of 25m<sup>2</sup></u>.</li> </ul> |
| <b>Non-residential uses – Noise amenity</b>                                                                                                                                                         |                                                                                                                                                                                                                                                           |
| PO <sub>2</sub> The non-residential use does not adversely impact on the amenity of the surrounding residential land uses and/or residential streetscape character.                                 | AO <sub>2.1</sub> New building plant or air-conditioning equipment is located central to the building and screened from view of the street or adjoining residential uses.                                                                                 |
| PO <sub>3</sub> Hours of operation are controlled so that the non-residential use does not impact on the amenity or privacy of adjoining residential uses.                                          | AO <sub>3.1</sub> Non-residential uses do not create audible noise between the hours of 7:00 pm and 6:00 am.                                                                                                                                              |
| <b>Non-residential uses – Privacy and screening</b>                                                                                                                                                 |                                                                                                                                                                                                                                                           |
| PO <sub>4</sub> Non-residential uses provide adequate separation, buffering and screening from adjoining residential premises so that the privacy and amenity of residential premises is protected. | AO <sub>4.1</sub> A 1.8m high solid screen fence and 1.5m wide strip of screen landscaping are provided along all boundaries shared with an adjoining residential use.                                                                                    |

| PO <sub>37</sub> Where located on land that is affected by environmental emissions generated by an operational rail corridor, sensitive development mitigates noise impacts on the development generated by the railway.                                                                                                                                                                                               | No acceptable outcome nominated.                                                                                                                                      |
| <b>Health Support Precinct</b>                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                       |
| PO <sub>38</sub> Development accords with the land use direction provided by the Health Support Precinct Structure Plan, Figure 6.6.5:6, in particular the precinct accommodates health care services and short-term accommodation that support the function of the adjacent hospital, residential development and commercial development, with commercial development only occurring as part of a mixed use building. | AO <sub>38.1</sub> Development in the Residential (Mixed use) area provides no more than 30% of the gross floor area of the proposal for non residential uses.        |
| <p><b>Figure 6.6.5:6 Health Support Precinct Structure Plan</b></p>                                                                                                                                                                                                                                                                |                                                                                                                                                                       |
| PO <sub>39</sub> Development provides improved connectivity to providing new linkages including:<br>(a) improved east west linkages through the precinct to West Creek corridor; and<br>(b) improvements to the public realm that enhance these connections.                                                                                                                                                           | AO <sub>39.1</sub> Development provides improved linkages in locations shown Health Support Precinct Structure Plan: Figure 6.6.5:6.                                  |
| PO <sub>40</sub> Car parking is designed so as not to dominate the interface with the creek corridor.                                                                                                                                                                                                                                                                                                                  | AO <sub>40.1</sub> Parking is provided as:<br>(a) basement or half basement; or<br>(b) above (but not at) ground level; or<br>(c) in the centre of development sites. |

## 6.6.6 Rural Zone Code<sup>49</sup>

### 6.6.6.1 Application

This code applies to assessable development:-

- (1) within the Rural Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Rural Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.6.2 Purpose and overall outcomes

- (1) The purpose of the zone is to:
  - (a) provide for a wide range of rural uses including cropping, intensive horticulture, intensive animal industries, animal husbandry, animal keeping and other primary production activities;
  - (b) provide opportunities for non rural uses that are compatible with agriculture, the environment, and the landscape character of the rural area where they do not compromise the long term use of the land for rural purposes; and
  - (c) protect or manage significant natural features, resources, and processes, including the capacity for primary production.

In addition, the zone code aims to:

- (a) protect the productive capacity of all rural land for rural use;
  - (b) protect water quality and the ecological and hydrological processes of waterways and wetlands;
  - (c) protect the landscape character and its associated visual and scenic amenity;
  - (d) minimise the potential for conflict between rural uses and other uses;
  - (e) provide for the establishment of appropriately scaled agri- and eco-tourism activities that are based on farm life or primary production in the locality, or on the scenic or environmental values of the locality;
  - (f) provide for intensive animal industries including feedlots, piggeries and poultry farms; and
  - (g) protect rural land from fragmentation that diminishes its productive capacity.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) areas used or suitable for primary production are conserved and are not further fragmented;
  - (b) the establishment of a wide range of rural pursuits is facilitated, including cropping, intensive horticulture, intensive animal industries, animal husbandry and animal keeping and other compatible primary production uses;
  - (c) uses that require isolation from urban areas as a consequence of their impacts, such as noise or odour, may be appropriate where land use conflicts are minimised;
  - (d) development incorporates sustainable land management and other sustainable practices that maximise energy efficiency, water conservation and encourages sustainable transport use;
  - (e) development contributes to the amenity and landscape character of the area;
  - (f) the establishment of non rural activities that are directly associated with and subordinate to rural production, natural resources and landscape amenity is facilitated in a manner that minimises land use conflicts and is compatible with the character and environmental values of the locality. Suitable activities may include small-scale outdoor recreation, tourism facilities, short-term accommodation, home based businesses, and produce sales;
  - (g) rural industries are facilitated where:

<sup>49</sup> Amended on 3 November 2014

- (i) associated with rural production in the immediate vicinity;
- (ii) avoiding or minimising adverse impacts on the amenity of the locality; and
- (iii) compatible with the infrastructure in the locality.
- (h) natural features such as creeks, gullies, waterways, wetlands and bushland are retained, managed, enhanced and provided with appropriate buffers from development;
- (i) adverse impacts of land use, both on-site and on adjoining areas, are avoided and any unavoidable impacts are minimised through location, design, operation and management;
- (j) existing intensive animal industries are protected from the intrusion of non rural activities such as small-scale outdoor recreation and tourism facilities;
- (k) the viability of both existing and future rural uses and activities are protected from the intrusion of incompatible uses; and
- (l) development has access to development infrastructure including utility installations and essential services.

#### 100 Hectare Precinct

- (3) The overall outcome of the 100 Hectare Precinct within the Rural Zone is that the productive, natural and landscape values of highly fragmented rural land are preserved by the prevention of further fragmentation.

#### 200 Hectare Precinct

- (4) The overall outcome of the 200 Hectare Precinct within the Rural Zone is that the productive, natural and landscape values of rural land which is relatively unfragmented are preserved by the prevention of fragmentation.

#### Heinemann Road Transport Precinct

- (5) The overall outcome of the Heinemann Road Transport Precinct within the Rural Zone is that:
  - (a) the precinct provides for the establishment of transport and associated logistics uses that capitalise on the strategic location of the precinct close to the regional road network system and Toowoomba; and
  - (b) the scale, character and built form of development contributes to a high standard of amenity.

### 6.6.6.3 Criteria for assessment

**Table 6.6.6:1 – Rural Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                       | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                |

## 6.6.7 Rural Residential Zone Code<sup>52</sup>

### 6.6.7.1 Application

This code applies to assessable development:-

- (1) within the Rural Residential Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Rural Residential Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.7.2 Purpose and overall outcomes

- (1) The purpose of the zone is to provide for residential development on large lots where Local Government infrastructure and services may not be provided and where the intensity of residential development is generally dispersed. Development for large residential lots provides for a range of residential housing styles to meet the needs of the community. Development maintains a semi-rural landscape character and expansion of these localities does not occur.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) the development of large residential lots with limited provision of infrastructure and services is facilitated within this zone only;
  - (b) development within the zone preserves the environmental and topographical features of the land by integrating an appropriate scale of residential activities amongst these features;
  - (c) development avoids areas of ecological significance;
  - (d) development is designed to incorporate sustainable practices including maximising energy efficiency and encouraging sustainable transport use;
  - (e) natural features such as creeks, gullies, waterways, wetlands and vegetation and bushland are retained, enhanced and buffered from the impacts of development. Any unavoidable impacts are minimised through location, design, operation and management of the development;
  - (f) development provides a high level of residential amenity;
  - (g) non-residential uses may be appropriate where such uses meet the day to day convenience needs of the residential catchment in the zone or have a direct relationship and rely on the endemic characteristics of the land in which they are located. Non-residential uses are compatible with the semi-rural and low intensity residential character of the zone and are consistent with the following outcomes;
    - (i) non-residential uses are not located in areas with limited infrastructure and services necessary to meet the needs of the development;
    - (ii) low-impact activities such as small-scale eco-tourism and outdoor recreation are encouraged within the zone where the impacts of such uses can be minimised;
    - (iii) uses such as a shop, community use, health care services and veterinary services may be appropriate where the building form is of a scale consistent with the surrounding rural residential locality, and the use does not undermine the viability of other centres or services/facilities within the rural residential catchment of the use;
    - (iv) low intensity rural activities are appropriate where they do not adversely impact on the amenity of the surrounding locality and are consistent with the intended character of the zone; and

<sup>52</sup> Amended on 3 November 2014

- (v) adverse impacts of land use, both on-site and from adjoining areas, are avoided and any unavoidable impacts are minimised through location, design, operation and management;
- (h) development has access to development infrastructure including utility installations and essential services.

#### 4,000m<sup>2</sup> Precinct

- (3) The overall outcomes for this precinct are:
  - (a) provide for a very low density residential character located accessible and near to urban areas; and
  - (b) facilitate lots with a minimum lot size of 4,000m<sup>2</sup>.

#### 1 Hectare Precinct

- (4) The overall outcomes for this precinct are:
  - (a) provide for a semi-rural living environment, where development is subservient to and integrates with the natural or rural landscape; and
  - (b) facilitate lots with a minimum lot size of 1 hectare.

#### 2 Hectare Precinct

- (5) The overall outcomes for this precinct are:
  - (a) provide for a generally rural amenity and character;
  - (b) facilitate lots with a minimum lot size of 2 hectares; and
  - (c) facilitate cropping and animal husbandry activities.

### 6.6.7.3 Criteria for assessment

**Table 6.6.7.1 – Rural Residential Zone Code – for self assessable and assessable development**

| Performance outcomes                      |                                                                                                                                                                                                                                           | Acceptable outcomes                                                                                                                                                |

## 6.6.8 Specialised Centre Zone Code<sup>53</sup>

### 6.6.8.1 Application

This code applies to assessable development:-

- (1) within the Specialised Centre Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Specialised Centre Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.8.2 Purpose and overall outcomes

- (1) The purpose of the Specialised Centre Zone Code provides for one (or more) specialised uses and activities, and to facilitate the effective on-going operation of these activities.

The overall outcomes sought for the zone code are as follows:

- (a) land within the zone remains available to accommodate specific uses, generally to the exclusion of other uses that are incompatible with the operational characteristics and nature of the specific uses;
- (b) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use such as public transport;
- (c) development does not compromise the viability, role and function of the hierarchy and network of centres;
- (d) natural features such as creeks, gullies, waterways, wetlands, habitats, vegetation and bushland are retained, enhanced and buffered from the impacts of adjacent uses and any unavoidable impacts are minimised through location, design, operation and management requirements.

#### Queensland Government Research Facility Precinct

- (1) The overall outcome of the Queensland Government Research Facility Precinct is:
  - (a) To facilitate the ongoing use and development of the Queensland Government Research Facility Centre for agricultural production systems research and for expansion of associated science, innovation and technology opportunities.

#### Toowoomba Airport Precinct

- (2) The overall outcomes of the Toowoomba Airport Precinct are:
  - (a) To facilitate the use of the land is as an airport, including general aviation, regional air emergency services, aviation communications and aviation training activities that are compatible with the primary use;
  - (b) uses and works for airport purposes are located, designed and managed to maintain safety to people, avoid significant adverse effects on the natural environment and minimise impacts on adjacent land.

#### Defence Facilities Precinct

- (3) The overall outcomes of the Defence Facilities Precinct is:
  - (a) to support the ongoing use of land for Department of Defence related purposes, including aviation, communications, administration, accommodation and recreation facilities for defence personnel.

#### Specialist Retail Centre Precinct

- (4) The overall outcome of the Specialist Retail Centre Precinct is:
  - (a) development provides for the establishment of large format retailing including bulky goods/showrooms, garden centre, hardware and trade supplies but not including supermarkets, department stores or discount department stores;

<sup>53</sup> Amended on 3 November 2014

- (b) the establishment of other business activities does not significantly reduce the area available for large format retailing and is limited to convenience retailing and food outlets/entertainment uses that support and are associated with the predominant large format retailing activities.

### 6.6.8.3 Criteria for assessment

**Table 6.6.8:1 – Specialised Centre Zone Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                     | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## 6.6.9 Township Zone Code<sup>56</sup>

### 6.6.9.1 Application

This code applies to assessable development:-

- (1) within the Township Zone as identified on the zoning maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Township Zone Code by the tables of assessment in Part 5 (Tables of assessment).

### 6.6.9.2 Purpose and overall outcomes

- (1) The purpose of the Township Zone Code is to provide for small to medium-size service centres located within a rural area.  
Development provides for a mix of uses including residential, retail, business, education, industrial, community purpose, recreation and open space which support the needs of the local rural community.  
Tourist facilities such as tourist attractions and short-term accommodation may be appropriate.
- (2) The overall outcomes sought for the zone code are as follows:
  - (a) a range of retail, commercial, industrial, administrative and cultural uses are provided that:
    - (i) are of a scale appropriate to serve the needs of the community and does not adversely affect the viability of other centres;
    - (ii) are conveniently located and accessible to residents and visitors;
    - (iii) are co-located with existing non-residential activities is preferred to reinforce a community focus/node, such as a main street; and
    - (iv) do not have adverse impacts on surrounding residential uses are minimised.
  - (b) a range of residential dwelling types are provided which reflect local housing needs and are developed at residential densities that are lower than that for other urban settlement areas;
  - (c) development protects and enhances the unique local or historic character of a town in a predominantly rural area;
  - (d) development services the needs of both local residents, residents of the surrounding rural area and visitors;
  - (e) development is designed to incorporate sustainable practices including maximising energy efficiency, water conservation and encourages sustainable transport use;
  - (f) development is reflective of and responsive to the environmental constraints of the land;
  - (g) community facilities and infrastructure which directly supports the local community are facilitated;
  - (h) development has access to a range of development infrastructure, including utility installations and essential services but may not include all forms of urban services, particularly reticulated wastewater;
  - (i) development provides a high level of amenity; and
  - (j) development is facilitated where it has a direct relationship with the local or historic character of the town.

<sup>56</sup> Amended on 3 November 2014

### 6.6.9.3 Criteria for assessment

Table 6.6.9:1 – Township Zone Code – for self assessable and assessable development

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                                                                      | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

# Appendix C

### 7.2.3 Charlton Wellcamp Enterprise Area Local Plan Code<sup>3</sup>

#### 7.2.3.1 Application

This code applies to assessable development:-

- (1) within the Charlton Wellcamp Enterprise Area Local Plan area as shown within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Charlton Wellcamp Enterprise Area Local Plan Code by the tables of assessment in Part 5 (Tables of assessment).

#### 7.2.3.2 Context and setting

- (1) The purpose of the Charlton Wellcamp Enterprise Area Local Plan Code is to provide additional local planning requirements for the Charlton Wellcamp Enterprise Area. The Charlton Wellcamp Enterprise Area is a regionally significant employment hub, accommodating a mix of business and industry activities that capitalises on the area's strategic location and competitive strengths.
- (2) The provisions of this local plan prevail over the provisions of any applicable zones, to the extent of any inconsistency. Development complies with this Code where it complies with the purpose of the Code. The purpose of the Code will be achieved through the Overall Outcomes. The Performance Outcomes express the Overall Outcomes in more detail. The Acceptable Outcomes represent the preferred way of complying with the Performance Outcomes, while there may be other ways of complying with the Performance Outcomes while still meeting the purpose of the Code.
- (3) The purpose of the code will be achieved through the following overall outcomes:
  - (a) Charlton Wellcamp Enterprise Area is a regionally significant employment hub, serving as a major business and employment area for the Toowoomba, Surat Basin Energy Province and broader Darling Downs Region. Intended to accommodate more than 10,000 employees, it is recognised as an important asset to the broader South-East Queensland and Queensland economies.
  - (b) Charlton Wellcamp Enterprise Area accommodates a mix of regionally significant business and industry activities that capitalises on the area's strategic location and competitive strengths, particularly proximity to regional transport networks and surrounding agricultural, energy and extractive industry activity. Accordingly, Charlton Wellcamp Enterprise Area will provide for transport and logistics and innovative major, high-impact and special industries providing high value-adding uses and employment opportunities.
- (4) The Area contains a number of precincts:  
**Intermodal Facility Precinct**
  - (a) The Intermodal Facility Precinct is located at the north of the Charlton Wellcamp Enterprise Area and incorporates approximately 359ha of developable land.
  - (b) The Intermodal Facility Precinct caters for enterprises that require the delivery of goods via rail or the interchange of freight between rail and road transport modes. It is envisaged that a number of businesses and facilities will be located in this precinct, including:
    - (i) road/rail freight interchange facilities;
    - (ii) major road freight terminal buildings and depots;
    - (iii) major rail freight terminals and depots; and
    - (iv) associated storage and operational facilities.

<sup>3</sup> Amended on 3 November 2014

- (c) Uses that are incompatible with the above facilities and activities not associated with the operation of intermodal activities are discouraged from establishing in the Intermodal Facility Precinct.
- (d) The intermodal facility is linked to the Surat Basin and the Port of Brisbane via a spur from the Western Railway line. In the longer term, the Melbourne to Brisbane inland rail line may be constructed, providing a link between Toowoomba and Moree and, ultimately, a connection to Melbourne.
- (e) The Precinct will be serviced by a spur line and sidings that connect to the Western Railway line. Two siding options have been explored - an east west orientation and a north south orientation. Each has the potential to satisfy current national rail design standards. Further investigation is required to identify the most suitable orientation in collaboration with Department of Transport and Main Roads and Queensland Rail.
- (f) The precinct will enjoy efficient access to the Warrego Highway and the proposed Toowoomba Bypass. Access to the Warrego Highway will be via a signalised intersection at O'Maras Road/Stegers Road. The Warrego Highway will have a future interchange with the Toowoomba Bypass.
- (g) Further subdivision and development of the precinct will not occur until a suitable rail siding alignment, with agreement from stakeholders, and the confirmation of a set alignment has been determined for the Melbourne to Brisbane inland rail line. Subdivision and development does not occur in the Precinct prior to relevant decisions being made about rail infrastructure, so as not to prejudice development of or limit siting and design flexibility for an intermodal facility.
- (h) The design and layout of the Intermodal Facility Precinct does not negatively impact upon the current or future operation of the Warrego Highway, Western Railway, the Proposed Toowoomba Bypass, or the Melbourne to Brisbane inland rail line.

#### Transport and Warehousing Precinct

- (a) The Transport and Warehousing Precinct is located to the north of the Warrego Highway, adjacent to the Intermodal Facility Precinct. The Transport and Warehousing Precinct covers a developable area of approximately 154ha.
- (b) The Transport and Warehousing Precinct provides land for road-based freight, transport, warehouse and distribution uses and facilities. The following uses are envisaged:
  - (i) road freight interchange facilities;
  - (ii) major road freight terminal buildings and depots; and
  - (iii) associated storage and operational facilities.
- (c) Uses considered incompatible with and activities not associated with the operation of the transport and warehouse uses are not supported in this precinct. Uses that do not take advantage of the high quality freight access opportunities are likewise not supported in this precinct.
- (d) Businesses within the Transport and Warehousing Precinct have synergies with the neighbouring Intermodal Facility Precinct.
- (e) The precinct will enjoy efficient links to the Intermodal Facility Precinct, Warrego Highway, and proposed Toowoomba Bypass Corridor. The design and layout of the Precinct does not negatively impact the current or future operation of the Warrego Highway, Western Railway, or the Proposed Toowoomba Bypass or Moree to Toowoomba section of the Melbourne to Brisbane inland rail line.

#### Wellcamp Low Impact Industry Precinct

- (a) The Wellcamp Low Impact Precinct is located to the southern side of the Toowoomba Cecil Plain Road, to the west of the quarry. The Wellcamp Low Industry Precinct covers a developable area of approximately 125ha.

**Formatted:** Indent: Left: 2.5 cm, No bullets or numbering

**Formatted:** Outline numbered + Level: 6 + Numbering Style: a, b, c, ... + Start at: 1 + Alignment: Left + Aligned at: 2.5 cm + Tab after: 3.5 cm + Indent at: 3.5 cm

- (a) The Wellcamp Low Industry Precinct provides for the establishment of low impact industry and separates potentially heavier forms of industry to the south from sensitive land uses to the north.
- (b) Development in the Wellcamp Low Industry Precinct is for low impact industry uses and compatible uses, such as warehousing, that are regionally significant, support or have direct nexus with other development in the Charlton Wellcamp Enterprise Area Local Plan.

(e)

**General Industry Precinct**

- (a) The General Industry Precinct is located to the south of the Warrego Highway and includes approximately 315ha of developable land.
- (b) The General Industry Precinct provides land for medium and large scale general industry enterprises that service a regional market (or greater) and are linked to other activities in the Region, particularly in the Surat Basin and greater Darling Downs area.
- (c) The following uses build upon the competitive strengths of the Region and are envisaged in the General Industry Precinct:
  - (i) food product manufacturing;
  - (ii) metal and metallic product manufacturing;
  - (iii) building & construction material manufacturing;
  - (iv) machinery & equipment manufacturing;
  - (v) other chemical product manufacturing; and
  - (vi) leather and leather product manufacturing (e.g., specialised saddle and harness manufacture).
- (d) Initial development in the precinct is accommodated in the area immediately to the south of Warrego Highway, with longer term development in the area abutting the northern edge of Toowoomba Cecil Plains Road.

**Heavy Industry Precinct**

- (a) The Heavy Industry Precinct is located in the southernmost part of the Local Plan area. Developable land included within the Heavy Industry Precinct totals approximately 520ha.
- (b) The Heavy Industry Precinct provides land for high-impact industries of regional, state or national significance, with specific industry types and requirements developed in consultation with the State Government.
- (c) Servicing within the Precinct is not reliant on the development of services elsewhere in the Charlton Wellcamp Enterprise Area and will conform to best practice environmentally sustainable development and industrial efficiency standards.
- (d) The activities of the Heavy Industry Precinct do not adversely impact on the amenity or viability of the other industries within the Charlton Wellcamp Enterprise Area Local Plan.

**Commercial Centre Precinct**

- (a) The Commercial Centre Precinct meets the commercial, retail and service needs of the employee population in the Charlton Wellcamp Enterprise Area and passing traffic along the Warrego Highway.
- (b) Centres have high visual exposure to major arterials and sub-arterials and are also conveniently located and easily accessible to employment areas throughout the Charlton Wellcamp Enterprise Area Local Plan.
- (c) The nature of the retail activity is focused on servicing the needs of workers and businesses within the Charlton Wellcamp Enterprise Area. The ultimate mix of services accommodated in the Commercial Centre Precinct comprise a limited mix

Formatted: Indent: Left: 2.5 cm, No bullets or numbering

- of business activities that service the day-to-day needs of workers and businesses including food and drink outlet, hotel, sales office, service station, and shop uses.
- (d) Two new commercial centres are anticipated in the precinct:
- (i) Charlton North commercial centre - provides for an expansion of the existing commercial centre at Charlton at the intersection of the Warrego Highway, O'Maras Road and Steger Road. This commercial centre will primarily service the north portion of the Local Plan area as well as passing traffic on the Warrego Highway;
  - (ii) Charlton South commercial centre - is located along O'Maras Road to the south of Dry Creek. The centre services the southern portion of the Local Plan area.

#### Conservation Precinct

- (a) The purpose of the Conservation Precinct is to protect environmental values whilst managing stormwater and flooding.
- (b) The Charlton Wellcamp Enterprise Area landscape is characterised by predominantly cleared rural land. There are few known ecological values within the Charlton Wellcamp Enterprise Area Local Plan due to clearing for agricultural production and extractive industry.
- (c) Mapped areas of significant vegetation within the Charlton Wellcamp Enterprise Area Local Plan are areas identified on the Regional Ecosystem mapping as Not of Concern. Where practical this vegetation will be retained.
- (d) There is a significant possibility of isolated areas of significant vegetation and/or threatened species occurring across the area including nationally significant grassland and woodland communities.
- (e) Notwithstanding the low ecological values present in the Local Plan area, there are opportunities to rehabilitate ecosystem function in the Open Space Precinct and along riparian corridors. The Charlton Wellcamp Enterprise Area contains two (2) significant waterways (Westbrook Creek and Dry Creek), with Gowrie Creek located to the north of the Western Rail Line, just outside the Charlton Wellcamp Enterprise Area. There are also a number of smaller waterways and drainage lines throughout the site. Buffering of 140m (70m on either side from the centreline of a waterway) is provided along the major waterway line, providing for flood mitigation and riparian conservation and rehabilitation.
- (f) Low impact recreational uses are suitable within riparian corridors. Such uses are generally compatible with environmental values. Linear open spaces present opportunities to provide trails that link into the broader pedestrian and cycle network.

#### Quarry Precinct

- (a) The existing quarrying activities in this precinct continue, and expand in an environmentally responsible way.
  - (b) Progressive rehabilitation and landscaping of land in the precinct during and at the conclusion of the working life of the quarry occurs and an effective buffer area between quarrying activities and surrounding land is maintained within the precinct.
- (5) Development within the Charlton Wellcamp Enterprise Area provides for the timely, efficient and effective provision of infrastructure in a form that meets the needs of the type of industry encouraged within the area.
- (6) Charlton Wellcamp Enterprise Area is suitable as a regionally significant enterprise area due to its access to regional transport networks. The following existing and proposed major transport routes are essential to the successful delivery of the Charlton Wellcamp Enterprise Area and their implementation and operational efficiency is not to be prejudiced:
- (a) Warrego Highway.
  - (b) Gore/Newell Highway.

- (c) Proposed Toowoomba Bypass.
  - (d) Western Railway.
  - (e) Proposed link to the Port of Gladstone.
  - (f) Proposed Melbourne to Brisbane Inland Rail.
- (7) The functional layout of development in the Local Plan area capitalises on its location at the junction of regionally significant road and rail links, providing unparalleled access to regional and interstate freight transport and industrial enterprise hubs.
  - (8) The Local Plan area has a well integrated internal transport network with efficient links to the regional and interstate road and rail freight routes. The internal transport network is focussed on Stegers Road, O'Maras Road and Toowoomba Cecil Plains Road.
  - (9) All elements of the transport network are designed and constructed to maximise efficiency in transport and minimise potential for conflicts.
  - (10) An integrated public transport system provides convenient services throughout Charlton Wellcamp Enterprise Area and provides frequent, efficient connections to the Toowoomba urban area and key destinations in the Region.
  - (11) Pedestrian pathways and bicycle connections are provided throughout the Local Plan area.
  - (12) Infrastructure will be provided that contributes to the competitive strengths of the Local Plan area, and that supports the planned development of the area.
  - (13) All infrastructure networks are provided to the Local Plan area at the level capable of servicing the proposed development and which considers the needs of future development.
  - (14) The development and use of land within the zones for transport and industry purposes is dependent on the availability of adequate infrastructure. Until such time as infrastructure becomes available, the continued rural use of such lands is supported.
  - (15) Development minimises land use conflicts and impacts on amenity through good design and appropriate siting of lots and buildings.
  - (16) The industrial activities located in the Local Plan area are able to operate 24 hours a day, providing an active enterprise location.
  - (17) New development and ongoing business operations exemplify best practice sustainable design principles and technologies.
  - (18) Charlton Wellcamp Enterprise Area is aesthetically appealing, well-connected, functional, economically viable and environmentally sustainable, thereby setting the benchmark for best practice industrial and enterprise development of this type.
  - (19) New development is located, designed, sited and used in ways that avoids environmental harm and does not present unacceptable environmental, health or safety risks.
  - (20) Development is sited to minimise land use conflicts between industrial activities and surrounding sensitive land uses.

### 7.2.3.3 Criteria for assessment

**Table 7.2.3:1 – Charlton Wellcamp Enterprise Area Local Plan Code – for assessable development**

| Performance outcomes                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| PO <sub>40</sub>                        | The preferred land uses in the Commercial Centre Precinct are focussed on servicing the needs of workers and businesses in the Charlton Wellcamp Enterprise Area Local Plan area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | AO <sub>40.1</sub> The built form is appropriate to the function of the Commercial Centre Precinct as a local service centre, incorporating uses such as: <ul style="list-style-type: none"> <li>(a) food and drink outlet;</li> <li>(b) hotel (where in the Charlton North Commercial Centre Sub-Precinct);</li> <li>(c) sales office;</li> <li>(d) service station (where in the Charlton North commercial centre);</li> <li>(e) short-term accommodation (where in the Charlton North commercial centre); and</li> <li>(f) shop.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| PO <sub>41</sub>                        | <p>Built form within the Commercial Centre Precinct contributes to the character of the area by creating a pedestrian scale village atmosphere. This is achieved through high quality building design which presents a human scale and addresses public areas.</p> <p>Buildings in the Commercial Centre Precinct reflect the human-oriented nature of the precinct as compared to the industrial areas of the Charlton Wellcamp Enterprise Area Local Plan area, through distinctions in building design, form and scale.</p> <p>All buildings and structures are designed to reflect the desired image of the Charlton Wellcamp Enterprise Area Local Plan area as a contemporary enterprise area.</p> | <p>AO<sub>41.1</sub> All buildings and structures are designed to reflect the desired image of the Charlton Wellcamp Enterprise Area Local Plan area as a contemporary enterprise area.</p> <p>AO<sub>41.2</sub> The Charlton North Commercial Centre functions as a gateway marker to the Local Plan area. To reinforce this role, the architectural design is distinctive and promotes the image of Charlton Wellcamp as a regionally significant enterprise area.</p> <p>AO<sub>41.3</sub> Buildings address outdoor public areas including footpaths, open space and car parks.</p> <p>AO<sub>41.4</sub> Pedestrian routes are covered by protective awnings and shade trees over footpaths.</p> <p>AO<sub>41.5</sub> Vistas are created by street trees along the edges of footpaths and road pavement, road alignment, topography and overall built form.</p> <p>AO<sub>41.6</sub> Building design addresses main roads, public areas and adjoining open space, to create an integrated, urban built form.</p> <p>AO<sub>41.7</sub> Buildings are designed with flexible layouts and building heights to enable occupancy by different uses over time. This is achieved through buildings with floor to ceiling heights of: <ul style="list-style-type: none"> <li>(a) ground level: 3.3m minimum to allow for commercial and/or retail uses; and</li> <li>(b) all other floors: 3m minimum.</li> </ul> </p> <p>AO<sub>41.8</sub> Dominant uses such as the service station and the hotel are integrated with the overall design and architectural style for the site, making a positive contribution to the image of the centre.</p> |
| PO <sub>42</sub>                        | The public realm within centres contributes to a human scale village atmosphere with high levels of user amenity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | AO <sub>42.2</sub> Development oriented to street frontages incorporates feature points such as pedestrian thoroughfares (arcades), entries, corners and congregation areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Table 7.2.3:2 – Industrial Streets Summary of Acceptable Outcomes**

| Road Classification                         | Minimum Reserve Width | Carriageway Width (Traffic Lane) | Median Width | Minimum Verge Width Each Side | Recommended Nominal Reserve Width |
|---------------------------------------------|-----------------------|----------------------------------|--------------|-------------------------------|-----------------------------------|
| Highway                                     | 60 – 100m             | 14m – 14.8m<br>(4 x 3.5–3.7)     | 5m           | 9 – 13m                       | 100m                              |
| Industrial Sub-arterial (4 lanes)           | 36m                   | 14m (4 x 3.5)                    | 5m           | 8.5m                          | 36m                               |
| Industrial Distributor (2 lanes)            | 31m                   | 14m (2 x 7)                      | -            | 8.5m                          | 31m                               |
| Industrial Collector/Local Access (2 lanes) | 31m                   | 14m (2 x 7)                      | -            | 7m                            | 28m                               |

## 8.4 Infrastructure overlay codes category

### 8.4.1 Regional Infrastructure Corridors and Substations Overlay Code<sup>9</sup>

#### 8.4.1.1 Application

This code applies to assessable development:-

- (1) subject to the Regional Infrastructure Corridors and Substations Overlay shown on the overlay maps contained within Schedule 2 (Mapping); and
- (2) identified as requiring assessment against the Regional Infrastructure Corridors and Substations Overlay Code by the tables of assessment in Part 5 (Tables of assessment).

#### 8.4.1.2 Purpose and overall outcomes

- (1) The purpose of the Regional Infrastructure Corridors and Substations Overlay Code is to protect existing significant infrastructure, specifically ensuring that any nearby new development does not compromise its role, function and operation.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) adequate buffering is provided between sensitive land uses<sup>10</sup> and the identified infrastructure;
  - (b) the health and safety of people and property is maintained; and
  - (c) the existing and future safety and efficiency of the identified infrastructure is protected.

#### 8.4.1.3 Criteria for assessment

**Table 8.4.1:1 – Regional Infrastructure Corridors and Substations Overlay Code – for assessable development**

| Performance outcomes              |                                                                                                                                                                                                                                                                                                                               | Acceptable outcomes                 |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| Petroleum / Natural Gas Pipelines |                                                                                                                                                                                                                                                                                                                               |                                     |
| PO <sub>1</sub>                   | Development is separated from a petroleum and natural gas pipeline and associated easements (as identified on Overlay Maps) such that: <ol style="list-style-type: none"> <li>(a) the safe operation and maintenance of the pipeline is not compromised; and</li> <li>(b) people and property are not put at risk.</li> </ol> | No acceptable outcome is nominated. |

<sup>9</sup> Amended on 3 November 2014

<sup>10</sup> Sensitive Land Uses are defined in Schedule 1 of the State Planning Policy 5/10 Air, Noise and Hazardous Materials. The list of sensitive land uses includes: child care centre, community care centre, dwelling house, educational establishment, health care services, hospital, multiple dwelling, office, relocatable home park, residential care facility, retirement facility, rooming accommodation, short-term accommodation and tourist park.

### 9.3.7 Medium Density Residential Code<sup>24</sup>

#### 9.3.7.1 Application

- (1) This code applies to assessable development identified as requiring assessment against the Medium Density Residential Code by the tables of assessment in Part 5 – Tables of Assessment.

#### 9.3.7.2 Purpose

- (1) The purpose of the Medium Density Residential Code is to guide the development of the following uses to ensure that medium density residential development creates pleasant, safe and attractive living environments while facilitating a range of housing types that sensitively blend with existing streetscapes and neighbourhoods and facilitate increased population within proximity to major centres:
- ~~(a)~~ (a) Community Residence.
  - ~~(a)~~ (b) Dual Occupancy (detached)
  - ~~(b)~~ (c) Multiple Dwelling.
  - ~~(c)~~ (d) Nature-based Tourism.
  - ~~(d)~~ (e) Non-resident Workforce Accommodation.
  - ~~(e)~~ (f) Relocatable Home Park.
  - ~~(f)~~ (g) Residential Care Facility.
  - ~~(g)~~ (h) Retirement Facility.
  - ~~(h)~~ (i) Resort Complex.
  - ~~(i)~~ (j) Rooming Accommodation.
  - ~~(j)~~ (k) Short-Term Accommodation.
  - ~~(k)~~ (l) Tourist Park.
- (2) The purpose of the code will be achieved through the following overall outcomes:
- (a) the character, scale and density of development are commensurate with the purpose and overall outcomes of the zone or precinct in which the development is proposed;
  - (b) development facilitates a high level of residential amenity including provision of adequate safety, privacy, access to sunlight, open space, ventilation and natural climate control;
  - (c) increased residential densities to promote the creation of walkable communities within proximity to the major centres of Highfields, Kearneys Spring, Clifford Gardens and Wilston and along Ruthven Street between Perth and Stenner Streets;
  - (d) development contributes positively to the local streetscape and reflects Toowoomba's 'garden city' character; and
  - (e) development does not create unacceptable impacts on surrounding premises.

## 9.3.8 Rural Uses Code

### 9.3.8.1 Application

- (1) This code applies to assessable development identified as requiring assessment against the Rural Uses Code by the tables of assessment in Part 5 – Tables of Assessment.

### 9.3.8.2 Purpose

- (1) The purpose of the Rural Uses Code is to guide the development of the following uses to facilitate the appropriate development of a range of rural activities and to protect the productive capacity and natural resource values of rural land:
  - (a) Animal Keeping.
  - (b) Aquaculture.
  - (c) Intensive Animal Industries.
  - (d) Intensive Horticulture.<sup>25</sup>
  - (e) Permanent Plantations.
  - (f) Rural Industry.
  - (g) Wholesale Nursery.
  - (h) Winery.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) development is located, designed and operated to avoid or appropriately minimise impacts on the amenity and character of the locality;
  - (b) areas or values of environmental significance including biodiversity, waterways, wetlands, water quality and soil quality, are protected from the adverse impacts of development; and
  - (c) development is provided with an appropriate standard of infrastructure that reflects the operational needs/capacity of the development and does not adversely impact on existing infrastructure or the carrying capacity of land in the locality.

<sup>25</sup> For intensive horticulture, applicants should have regard to the Section 3 of the SPP1/92 – Planning Guidelines – Separating agricultural and residential land uses. For other uses Council may require a study that, amongst other matters, identifies how the development is in accordance with Environmental Protection (Air) Policy 1997 or Environmental Protection (Noise) Policy 1997.

### 9.3.10 Telecommunications Facility Code<sup>27</sup>

#### 9.3.10.1 Application

- (1) This code applies to assessable development identified as requiring assessment against the Telecommunications Facility Code by the tables of assessment in Part 5 – Tables of Assessment.

#### 9.3.10.2 Purpose

- (1) The purpose of the Telecommunications Facility Code is to ensure that telecommunications facilities are visually integrated with the surrounding natural and built environment and co-located or provide for co-location.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) development minimises adverse impacts to the community and environment, including impacts of noise and electromagnetic emissions and visual amenity;
  - (b) development implements best practice with respect to design, environmental management and construction standards;
  - (c) sufficient all-weather access is provided to the site/facility and maintained; and
  - (d) risks to public health and safety are minimised.

<sup>27</sup> Amended on 3 November 2014

### 9.3.10.3 Criteria for assessment

**Table 9.3.10.1 – Telecommunications Facility Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                              | Acceptable outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## 9.4.5 Reconfiguring a Lot Code<sup>31</sup>

### 9.4.5.1 Application

- (1) This code applies to assessable development identified as requiring assessment against the Reconfiguring a Lot Code by the tables of assessment in Part 5 – Tables of Assessment.

### 9.4.5.2 Purpose

- (1) The purpose of the Reconfiguring a Lot Code is to:
  - (a) provide for good neighbourhood design, consistent with the character and environmental values of the zone and precinct in which the land is located;
  - (b) ensure the creation of a sense of place and distinctive identity;
  - (c) protect important natural features and values, economic resources and places of cultural heritage significance;
  - (d) ensure lot reconfiguration provides for an efficient and well integrated urban form, and in rural areas provides for sustainable use of land and agricultural resources;
  - (e) ensure lot reconfiguration facilitates safe and efficient provision of, and equitable access to, infrastructure and services;
  - (f) ensure transport networks provide for appropriate levels of accessibility and accommodate a wide range of travel modes including walking, cycling and the use of public transport; and
  - (g) encourage development to be resource efficient.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) lot reconfiguration facilitates the creation of safe, convenient, functionally efficient and attractive environments, consistent with the desired character of the zone or precinct in which the site is situated;
  - (b) lot reconfiguration meets the diverse needs of the community for a range of affordable housing types, accessible commercial and community facilities and local employment opportunities;
  - (c) lot reconfiguration is responsive to the local environment, including its topography, natural drainage systems, vegetation and habitat, cultural heritage features, streetscape character, landmarks, views and vistas;
  - (d) lot reconfiguration facilitates the protection and sustainable use of rural land resources;
  - (e) areas containing important ecological values and cultural values are protected from development and the associated impacts caused by development;
  - (f) lot reconfiguration facilitates compatible relationships between different land uses and activities;
  - (g) lot design and sizes are suited to the intended use of the land;
  - (h) lot orientation facilitates the conservation of non-renewable energy sources and the design of buildings that are appropriate for the local climatic conditions;
  - (i) infrastructure is supplied to all lots in a safe, efficient, coordinated and sequenced manner which minimises whole of life cycle costs and is sensitive to the environment in which they are provided;
  - (j) stormwater drainage systems protect people and the built and natural environments in a cost effective manner;
  - (k) the street system provides identified functions for each street, provides acceptable levels of access, safety and convenience for all users and provides for a high level of connectivity and permeability;

<sup>31</sup> Amended on 3 November 2014

- (l) lot reconfiguration increases opportunities for walking, cycling and the use of public transport; and
- (m) public open space is attractive and accessible and equitably meets user requirements for recreational, social and cultural activities.

### 9.4.5.3 Criteria for assessment

**Table 9.4.5:1 – Reconfiguring a Lot Code – for self assessable and assessable development**

| Performance outcomes                                                                                                                                                                                                                                                                                                                                                | Acceptable outcomes                                                                                                                                                                                                              |

| <p>PO<sub>9</sub> Reconfigurations within the Low-medium Density Residential Zone and the Emerging Community Zone contribute to housing diversity by incorporating a mix of residential lot sizes drawing from the following lot types:</p> <ul style="list-style-type: none"> <li>(a) Traditional: A traditional lot caters for large dwelling houses, typically on lots with a frontage of up to 20m and depth of 30m to 32m for single storey dwelling houses and 25m for two (2) storey dwelling houses.</li> <li>(b) Multi-family: A multi-family lot allows for small multiple dwellings (typically four (4) to six (6) dwellings). Multiple dwellings on multi-family lots contribute significantly to diversity within a neighbourhood. Multi-family lots will typically be provided on-street corners to reduce the negative impact of rows of garage doors.</li> <li>(c) Courtyard: A courtyard lot has an area between 375m<sup>2</sup> and 480m<sup>2</sup> and comfortably accommodates a smaller detached dwelling house on a lot with a frontage of approximately 15m.</li> <li>(d) Villa: A villa lot has an area between 250m<sup>2</sup> and 320m<sup>2</sup> and accommodates a smaller dwelling house on a lot with a frontage of approximately 10m. It is suited to the housing needs of an increasing number of one and two person households. A dwelling house on a villa lot is detached but usually built to one side boundary of the lot.</li> <li>(e) Terrace: A terrace lot has an area between 187.5m<sup>2</sup> and 240m<sup>2</sup> and will typically accommodate attached dwellings houses or dwelling houses built to both side boundaries on lots with a frontage of typically 7.5m. Dwelling houses on a standard 7.5m terrace lot will generally be two (2) habitable rooms wide and two (2) storeys in height. A terrace lot is also capable of development with a narrow (4m wide) single-storey detached dwelling house where one wall is built up to, and along most of the length of one side boundary. Dwelling houses on narrow terrace lots will be built as an integrated development as far as practicable and typically require frontage to both a street and laneway to accommodate on-site car parking that does not interfere with the safe and efficient functioning of the street;</li> </ul> | <p>AO<sub>9.1</sub> Reconfigurations incorporate the lot types identified in the performance outcome as follows:</p> <ul style="list-style-type: none"> <li>(a) reconfigurations creating between 10 and 50 additional lots incorporate at least two (2) lot types; and</li> <li>(b) reconfigurations creating more than 50 additional lots incorporate at least three (3) lot types.</li> </ul> |

| (f) Row: A row lot has an area between 125m <sup>2</sup> and 160m <sup>2</sup> and provides for narrow attached dwelling house or a dwelling house built to both side boundaries on lots with a frontage of typically 5m. A row lot typically requires rear lane access for car parking so the street frontage is free of driveways. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| PO <sub>10</sub> Reconfigurations within the Low-medium Density Residential Zone achieve a residential density that makes efficient use of the land and associated physical infrastructure.                                                                                                                                          | AO <sub>10.1</sub> Reconfigurations achieve a minimum residential density of 15 lots per hectare.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <p>PO<sub>36</sub> Where the lot reconfiguration is of land in the Low-medium Density Residential Zone, Low Density Residential Zone or Rural Residential Zone that is within 250m of land within the Medium Impact Industry Zone or 500m of High Impact Industry Zone it must not result in future sensitive uses within the site being exposed to industrial air, noise or odour emissions that impact on human health, amenity and wellbeing.</p>                                                                                                                                                                                                                                              | <p>AO<sub>36.1</sub> The use is designed to ensure that:</p> <ul style="list-style-type: none"> <li>(a) the indoor noise objectives set out in the <i>Environmental Protection (Noise) Policy 2008</i> are met; and</li> <li>(b) the air quality objectives in the <i>Environmental Protection (Air) Policy 2008</i>, are met through the use of measures such as: <ul style="list-style-type: none"> <li>(i) landscaping and open space;</li> <li>(ii) setbacks;</li> <li>(iii) the orientation of lots away from the industrial area;</li> <li>(iv) barriers, mounds and fencing; and/or</li> <li>(v) screening.</li> </ul> </li> </ul> |

<sup>35</sup> A report by a suitably qualified person may be required to allow an assessment to be made of the potential environmental impacts of or affecting the proposed reconfiguration.

Council recommends that applicants seeking approval for lots potentially affected by intensive animal industries refer to the 'Reference Manual for the Establishment and Operation of Beef Cattle Feedlots in Queensland', 'Queensland Dairy Farming Environmental Code of Practice' and 'Environmental Code of Practice for Queensland Piggeries' and that applicants consult with Primary Industries and Fisheries prior to the lodgement of a development application.

For agricultural uses and agricultural land generally, applicants should have regard to the Section 3 of the SPP1/92 – Planning Guidelines – Separating agricultural and residential land uses.

For other uses Council may require a study that, amongst other matters, identifies how the development is in accordance with Environmental Protection (Air) Policy 1997 or Environmental Protection (Noise) Policy 1997.

| <p>PO<sub>18</sub> Landscaping is provided to soften the visual impact of car parking areas and to provide shading and protection from glare.</p>                                                                                                                                                                                                                                                 | <p>AO<sub>18.1</sub> Aesthetics, glare, heat absorption and re-radiation.</p> <p>(a) Landscaping is provided throughout the car park in the manner and at the rate indicated in the Landscaping Code; and</p> <p>(b) Unless otherwise specified in a zone, precinct or use code, where the car park adjoins a street frontage, or a boundary with a Residential or other sensitive land use, a landscaped strip of minimum 3 m width is provided along the frontage/boundary.</p> <p>AO<sub>18.2</sub> Dust:</p> <p>(a) As a partial Acceptable Measure, the car park is imperviously sealed.</p> <p>AO<sub>18.3</sub> Noise:</p> <p>(a) As a partial Acceptable Measure, a solid, good quality brick, timber or masonry fence of minimum 1.8 m Height is constructed between the car park and any adjoining residential use or other noise sensitive land use.</p>                                                                                                                                             |
| <p>PO<sub>19</sub> Any part of the parking area designated as a vehicle cleaning or repair area is designed and constructed to avoid adverse impact on water quality or Council's wastewater or stormwater infrastructure.</p>                                                                                                                                                                    | <p>AO<sub>19.1</sub> The development is capable of meeting the requirements of Council's <i>Trade Waste Policy</i> and the Trade Waste Environmental Management Plan.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Servicing</b>                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <p>PO<sub>20</sub> Provision is made for the on-site loading, unloading, manoeuvring and access by service vehicles that:</p> <p>(a) is adequate to meet the demands generated by the development;</p> <p>(b) is able to accommodate the design service vehicle requirements; and</p> <p>(c) does not unduly impede vehicular, cyclist and pedestrian safety and convenience within the site.</p> | <p>AO<sub>20.1</sub> The service bays provided and access to them, can accommodate, at any one time, the types and numbers of service vehicles detailed in Table 9.4.6:3.</p> <p>AO<sub>20.2</sub> Service bays provided wholly or partly within a building are physically separated from the rest of the buildings floor space in manner that makes it impractical to use them as storage or work areas.</p> <p>AO<sub>20.3</sub> The design and provision of access driveways, manoeuvring areas and loading and unloading facilities for service vehicles complies with Australian Standard AS 2890.2 – 1989 – <i>Off Street Parking – Commercial Vehicle Facilities</i>.</p> <p>AO<sub>20.4</sub> Vehicles being loaded or unloaded with goods stand completely on-site and do not impede access to more than 6 parking spaces or 50% of the on-site parking spaces (whichever is the lesser) while doing so.</p> <p>AO<sub>20.5</sub> Service vehicles can enter and leave the site in a forward gear.</p> |
| <p>PO<sub>21</sub> Refuse collection vehicles are able to access on-site refuse collection facilities.</p>                                                                                                                                                                                                                                                                                        | <p>AO<sub>21.1</sub> Where an on-site refuse area is provided, access and manoeuvring areas are designed and provided to enable access by refuse collection vehicle based on the Design Service Vehicle in Austroads/Standards Australia HB72 – Design Vehicles and Turning Path Templates.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Performance outcomes                                                                                                                                                   | Acceptable outcomes                                                                                                                                                  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PO <sub>22</sub> Servicing arrangements minimise any adverse impact the amenity of premises in the vicinity.                                                           | No acceptable outcome is nominated.                                                                                                                                  |
| PO <sub>23</sub> Servicing arrangements are located and designed to avoid dominating the road frontage of the site or otherwise detracting from streetscape character. | AO <sub>23.1</sub> Areas used for servicing are not located at the front of developments, or are otherwise screened to minimise visual intrusion in the streetscape. |

**Table 9.4.6:3 – Car Parking Provision Rates**

For the purpose of interpreting Column 3 – Service Vehicle Provision Rate the following definitions apply:

- (1) 'No specific rate' – means the required number of parking spaces (or facilities for service vehicles) will be based on the circumstances of the specific proposal and assessed against the Performance Criteria and information provided with the application.
- (2) SRV - means Small Rigid Vehicle (for vehicle dimensions and manoeuvring requirements see Australian Standard AS 2890.2 – *Off Street Parking – Commercial Vehicle Facilities*).
- (3) HRV - means Heavy Rigid Vehicle (for vehicle dimensions and manoeuvring requirements see Australian Standard AS 2890.2 – *Off Street Parking – Commercial Vehicle Facilities*).
- (4) AV - means Articulated Vehicle (for vehicle dimensions and manoeuvring requirements see Australian Standard AS 2890.2 – *Off Street Parking – Commercial Vehicle Facilities*).

| Development                 | Parking Rates                                                                             | Service Vehicle Provision Rate                                                                                                                                  |
|-----------------------------|-------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Adult Store                 | One (1) space per 25m <sup>2</sup> GFA.                                                   | (1) Less than 500m <sup>2</sup> GFA – 1 HRV.<br>(2) 500m <sup>2</sup> – 1,999m <sup>2</sup> GFA – 1 AV.<br>(3) 2,000m <sup>2</sup> GFA plus – No specific rate. |
| Agricultural Supplies Store | One (1) space per 25m <sup>2</sup> GFA.                                                   | 1 AV.                                                                                                                                                           |
| Air Services                | Applicant to provide parking report justifying proposed provision of parking.             | No specific rate.                                                                                                                                               |
| Animal Husbandry            | No Parking Rate Nominated.                                                                | No specific rate.                                                                                                                                               |
| Animal Keeping              | One (1) space per employee 'Full Time Equivalent' (FTE) plus five (5) spaces.             | Nil.                                                                                                                                                            |

**AMENDMENT NO. 2**

**TOOWOOMBA REGIONAL PLANNING SCHEME**

***Explanatory Statement***

## Explanatory Statement

Full details of the changes are contained in *Toowoomba Regional Planning Scheme Amendment No. 2*.

### **Changes to Part 5 – Assessment Tables**

1. Designate a minimum lot size within the Rural Zone (Heinemann Road Transport Precinct) of 100 hectares.
  2. Make Multiple Dwellings code assessable in the Low-medium Density Residential Zone (Office Residential Precinct) where the building height does not exceed 3 storeys.
  3. Amend the code assessable condition statement for Dwelling Unit in the Principal Centre Zone.
  4. Amend the Major Centre Zone assessment table to remove any condition statement that treats Clifford Gardens differently to all other major centres.
  5. Amend the assessment conditions for Veterinary Services in the Specialist Centre Zone be amended to make it impact assessable in the Toowoomba Airport Precinct and Specialist Retail Centre Precinct.
  6. Amend the self assessment condition statement for Community Use in the Community Facilities Zone to include the reuse of an existing building used for a business or community activity.
  7. Make Education Establishment self assessable in the Community Facilities Zone Education and Higher Education Precincts where the reuse of an existing building, code assessable where in a new building and impact assessable in all other precincts.
  8. Make Hospital self assessable in the Community Facilities Zone (Hospital Precinct) where reusing an existing building and no more than 25m<sup>2</sup> additional GFA, code assessable where in the Hospital Precinct and a new building or reusing an existing building and proposing more than 25m<sup>2</sup> additional GFA and impact assessable in all other precincts.
  9. Amend the Mixed Use Zone assessment table to:
    - (a) Add the following condition to 'Service Industry' under code assessment:

“located in West Creek or the Bulky Goods/Service Industry and Low Impact Industry area of the City South Precincts”
    - (b) Make Home Based Business self assessable.
    - (c) Include a self assessment condition against Hostel and Multiple Dwelling that requires no more than 25m<sup>2</sup> additional GFA is proposed.
    - (d) Delete 'Shop' under exempt.
  10. Added the following to the list of assessment criteria for code assessable Caretaker's Accommodation in the Low Impact Industry Zone:
    - Highfields district local plan code (where in the Highfields district local plan area)
    - Glenvale local plan code (where in the Glenvale local plan area)
    - Charlton Wellcamp Enterprise Area local plan code (where in the Charlton Wellcamp Enterprise Area local plan area)
-

11. Make the Works and Services Code an assessment criteria for code assessable showrooms in the Principal Centre Zone and Caretakers Accommodation in the Low-medium Density Residential Zone.
12. Amend the condition statements for Community Use in the Low Density Residential Zone to refer to the reuse of an existing building used for a business or community activity.
13. Amend 5.3(8) to align with the QPP.
14. Amend the code assessable conditions for Office in the Community Facilities Zone to the following:

Office

If:

- (i) in the Education or Higher Education Precinct and if:
  - (a) not the reuse of an existing building used for a business activity; or
  - (b) the reuse of an existing building used for a business activity and more than 25m<sup>2</sup> additional Gross Floor Area is proposed;
- OR
- (ii) in Government or Hospital Precinct and more than 25m<sup>2</sup> additional Gross Floor Area is proposed;
- OR
- (iii) in the Other Community Purposes Precinct;
- OR
- (iv) meeting the description listed in the level of assessment column for self-assessment and not complying with one or more self-assessable acceptable outcomes in the assessment criteria identified for self-assessment.

15. Amend the Medium Impact Industry Zone assessment table to make the following uses code assessable:

- Garden Centre
- Hardware and Trade Supplies
- Outdoor sales
- Wholesale nursery

16. Amend the conditions statements for Shop in the Low Density Residential and Low-medium Density Residential zone to the following:

*Self assessable:*

If all of the below are satisfied:

- (i) the reuse of an existing building used for a business activity, excluding Sales Office;
- (ii) any food preparation area does not exceed 30m<sup>2</sup>;
- (iii) the gross floor area does not exceed 250m<sup>2</sup>; and
- (iv) the site is located on a Regional Arterial, Sub-Arterial or Distributor Road.

*Code Assessable:*

If

- (i) the reuse of an existing building used for a business activity and the site is located on a Regional Arterial, Sub-Arterial or Distributor Road and one of the following apply:
  - (a) the gross floor area exceeds 250m<sup>2</sup>, or
  - (b) any food preparation area exceeds 30m<sup>2</sup>; or

- (ii) meeting the description listed in the level of assessment column for self-assessment and not complying with one or more self-assessable acceptable outcomes in the assessment criteria identified for self-assessment.

17. Make telecommunication facility exempt in all zones were a low-impact facility as defined by the Telecommunications (Low-impact Facilities) Determination 1997.
18. Make the extension of an existing telecommunications tower by up to 5m in height or the replacement of an existing tower with one that is up to 5m higher self assessable in all areas.
19. Make the addition of one new telecommunication facility to a site containing one existing telecommunication facility code assessable where the new facility does not exceed the height of the existing facility or 10m in residential, rural residential, township , open space, sport and recreation and community facilities zones or 30m in any other zone.
20. Make any proposal that would result in more than two telecommunication facilities on a site impact assessable.
21. Make a telecommunication facility on a site in a residential, rural residential, township , open space, sport and recreation or community facilities zone not already containing a telecommunication facility impact assessable.
22. Make a telecommunication facility on a site in a zone other than a residential, rural residential, township , open space, sport and recreation or community facilities zone not already containing a telecommunication facility be code assessable if less than 30m in height and impact assessable if over 30m in height.
23. Make the planning scheme clear that co-location in relation to telecommunication facilities has the meaning given it in the Telecommunications (Low-impact Facilities) Determination 1997.
24. Remove the trigger for cropping and animal husbandry being escalated from exempt and self assessment respectively to code assessable in the Limited Development (constrained land) zone.
25. Amend the code assessment conditions for warehouse in the Township Zone to make the reuse of an existing showroom with more than 25m<sup>2</sup> additional floor area proposed code assessable.
26. Amend the self assessment condition for Rural Industry in the Township Zone to enable an existing building previously used for a Low Impact Industry to be reused as a Rural Industry.
27. Amend the assessment conditions for clubs in the residential zones, Township Zone, Open Space Zone, Community Facilities Zone and Rural Residential Zone to the following:

Self assessable:

If all of the below are satisfied:

- (i) the reuse of an existing building used for a business or community activity, excluding Sales Office;
- (ii) no more than 25m<sup>2</sup> additional Gross Floor Area is proposed; and
- (iii) the use is not a licensed premises.

Code assessable:

If on a Regional Arterial, Sub-Arterial or Distributor Road and not a licensed premises and:

- (i) not meeting the description listed in the level of assessment column for self-assessment; or
-

- (ii) meeting the description listed in the level of assessment column for self-assessment and not complying with one or more self-assessable acceptable outcomes in the assessment criteria identified for self-assessment.

Impact assessable in all other circumstances.

28. Amend the assessment conditions for Utility installation to make it self assessable in all zones if both of the below are satisfied:

- (i) for the distribution of local utility services; and
- (ii) does not involve bulk transmission, storage, generation and/or treatment.

and impact assessable in all other circumstances, except where in the Community Facilities Zone (Government Precinct) and not generation or treatment within 500m of a residentially zoned area, in which case it would be code assessable.

29. Amend the code assessment condition for Caretaker's residence in the Open Space Zone to the following:

If not complying with one or more self-assessable acceptable outcomes in the assessment criteria identified for self-assessment.

30. Amend the building works assessment table to make 'Minor Building Work' exempt and all other building work not otherwise mentioned in the assessment table and not a material change of use self assessable.

31. Make detached dual occupancies self assessable in zones where they are currently exempt.

32. Amend the references to "within the 20 to 25 ANEF" within the overlays assessment table to "within ANEF contour 20 and above".

33. Amend Table 5.10:1 – Overlays, to make all forms of accommodation activity code assessable under the following conditions:

'If:

- (i) within the separation area or 100m of a designated Haulage Route; and
- (ii) exempt or self assessable within the corresponding zone. '

34. Amend the exempt assessment condition applying to Dual Occupancy in the Low Density Residential Zone to replace 'and' with 'or'.

35. Amend the assessment condition for Community Care Centre in the Low Density Residential Zone to only enable the reuse of an existing building used for a business or community activity, excluding sales office as self assessable and amend the corresponding code assessment condition to be consistent with this change.

36. Replace the code assessment conditions for Dwelling Unit in the Principal Centre Zone with the following:

Dwelling Unit

If:

- (i) not the reuse of an existing building and not at ground floor level; or

- (ii) all of the below are satisfied:
    - (a) the reuse of an existing building; and
    - (b) more than 25m<sup>2</sup> additional Gross Floor Area is proposed; and
    - (c) the use is not at Ground Floor Level.
  - 37. Remove the word 'not' from the condition statement under code assessment applying to Major Sport, Recreation and Entertainment Facility in the Principal Centre Zone.
  - 38. Amend the code assessment condition statement for Tourist attractions within the Principal Centre zone to remove reference to the use being contained wholly within the building.
  - 39. Amend the code assessment condition statement for Warehouse in the Principal Centre Zone to remove the word 'not'.
  - 40. Amend any assessment level condition statement applying to self assessable uses in the Low-medium Density Residential , Low Density Residential or Rural Residential zones that refers to the reuse of an existing building used for a business activity to include the words (excluding Sales Office).
  - 41. Amend the code assessment condition statement "If it does not meet the relevant assessment criteria for self assessment." wherever it appears in the assessment tables to:

'if meeting the description listed in the level of assessment column for self-assessment and not complying with one or more self-assessable acceptable outcomes in the assessment criteria identified for self-assessment.'
  - 42. Amend the code assessment provisions within the Reconfiguring a Lot assessment table as follows:
    - (a) include the minimum lot sizes identified in the Charlton Wellcamp Enterprise Area Local Plan, except the Medium Impact Industry Zone (Intermodal Precinct).
    - (b) include the following zones and applicable minimum lot sizes:

Rural Residential Zone (Highway Precinct)- 4,000m<sup>2</sup>  
Rural Zone (Heinemann Road Transport Precinct) – 100ha
    - (c) transfer all minimum lot sizes to a separate table that follows the assessment table.
  - 43. Amend the Reconfiguring a Lot assessment table to make 'creating an easement giving access to a lot from a constructed road' code assessable.
  - 44. Delete the conditions in the assessment table for the Low Density Residential Zone (Stables Precinct), that make the following uses impact assessable:
    - Community Care Centre
    - Community Use
    - Health Care Centre
    - Office
    - Place of Worship
  - 45. Amend the assessment table for the Low Impact Industry Zone to make Park exempt.
-

46. Amend the assessment table relating to the Highfields Local Plan to make the reuse of an existing commercial building in the Highway Precinct code assessable where for a shop and impact assessable where for an office.

### **Changes to Part 6 - Zones**

47. Where ever the acceptable outcome “Non-residential uses are located on a Regional Arterial, Sub-Arterial or Distributor Road only and access to the development is not from a local street.” appears in the planning scheme the word ‘only’ be deleted.
48. Amend the acceptable outcome for self assessable development that requires no increase in gross floor area for non-residential development in the following zones to allow up to 25m<sup>2</sup> additional gross floor area:
- Low Density Residential Zone
  - Low-medium Density Residential Zone
  - District Centre Zone
  - Local Centre Zone
  - Community Facilities Zone
  - Mixed Use Zone
  - Rural Residential Zone
  - Township Zone

### **Changes to Part 7 – Local Plans**

49. Amend the precinct descriptions in the Charlton Wellcamp Enterprise Area Local Plan to align the location information in the description with their final location in the adopted planning scheme maps.
50. Delete the map titled Charlton Wellcamp Local Plan Map No.2.
51. Include the area of Low Impact Industry Zone on the south side of Toowoomba Cecil Plains Road be in a new precinct, being the ‘Wellcamp Low Impact Industry Precinct’ and include the following precinct description in the local plan:

“Wellcamp Low Impact Industry Precinct

(a) The Wellcamp Low Impact Industry Precinct is located on the south side of Toowoomba Cecil Plains Road, to the west of the quarry. The precinct covers a developable area of approximately 125ha.

(b) The precinct provides for the establishment of low impact industry and separates potentially heavier forms of industry to the south from sensitive land uses to the north.

(c) Development in the Wellcamp Low Industry Precinct is for low impact industry uses and compatible uses, such as warehousing, that are regionally significant, support or have direct nexus with other development in the Charlton Wellcamp Enterprise Area Local Plan.

### **Changes to Part 8 - Overlays**

52. Amend diagram 8.3.3:2 in the Scenic Amenity Code so that that legend is legible.
-

53. Delete the word 'and' from 8.2.2 Bushfire Overlay Code AO3.1(a) in table 8.2.2:2 so that it reads as follows:
- (a) being connected to a reticulated water supply with a minimum flow of 10 litres per seconds at 200kPa;

#### **Changes to Part 9 – Other Codes**

54. Amend PO1 within the Telecommunications Facility Code to replace references to facilities not being visually intrusive to minimising their visual intrusion and that not exceeding two facilities per site be identified as an additional acceptable outcome for minimising visual intrusion.
55. Amend the Medium Density Residential Code to include self assessment provisions for detached dual occupancies based on the provisions of part MP1.3 of the QDC.
56. Add a new performance outcome to the Telecommunications Facility Code requiring facilities to be sited to maximise their efficiency and minimise the number of towers required to service a specific area.
57. Amend PO15 within the Transport Access and Parking Code to the following:
- Car parking areas associated with the following:
- (a) a non-residential development in a residential zone, or  
(b) a non-residential development in a non-residential zone on a site that adjoins a residential zone,  
are designed to minimise any adverse impact on the amenity of premises in the vicinity.
58. Amend AO15.1 to 15.3 within the Transport Access and Parking Code to be prefaced with the following statement:
- For development associated with the following:
- (a) a non-residential development in a residential zone, or  
(b) a non-residential development in a non-residential zone on a site that adjoins a residential zone:
59. Amend AO15.1 within the Transport Access and Parking Code to the following:
- AO15.1 Car parking and driveway areas are setback a minimum distance of 3m from a side boundary that is common with a residential use in a residential zone.
60. Amend AO15.3 within the Transport Access and Parking Code be amended to the following:
- AO15.3 An acoustic fence of 1.8m height is provided along the property boundary that is common with a residential use in a residential zone.
61. Amend the Home Based Business Code to allow the parking of one vehicle per employee up to b-double in size within 100m of the site boundary where within the Rural Zone.
62. Amend the Advertising Devices Code in the following manner:
- (a) Include internal illumination as self assessment criteria for the following signs:
-

- Above awning sign
- Changeable message sign
- Ground sign

(b) Remove internal illumination as a self assessment criteria for Billboards.

63. Amend section (a) AO11.4 in the RAL Code to the following:

“500m<sup>2</sup> where connected to a reticulated wastewater system.”

64. Amend AO4.3 within the Reconfiguring a Lot Code to read:

“Street blocks fronting local streets do not exceed 100m in length.”

65. Amend PO 1 – 3 and the associated AOs for self assessable development within the Reconfiguring a Lot Code to refer to ‘lot’ in the plural.

66. Amend footnote 35 in the Reconfiguring a Lot Code to refer to Planning Scheme Policy No.1.

67. Amend AO11.2 within the Reconfiguration of a Lot Code as follows:

(a) Lots in the Low Density Residential and Low-medium Density Residential zones in greenfield areas have standard dimensions, being:

(i) depths of 25m and 32m; and

(ii) widths in multiples of 2.5m.

(b) Add a footnote referring to typical lot and shape diagrams on page 15 of Residential 30 Guideline amended to include laneways behind terrace and row lots.

### **Changes to Schedule 2 – Maps**

Some precincts aren’t identified in legend – amend legend to include all zones and precincts. Missing: Transport and Warehouse Precinct (Charlton) + Highway Precinct (Highfields)

The Low-medium Density Residential Zone (Regional residential precinct) currently is not identified on the zone maps. All areas that have this zone and precinct will be identified by REG and will affected the following maps in Land Uses Zones: Clifton 01, Crows Nest 02 to 03, Goombungee 01, Millmerran 01 to 04, Oakey05, Oakey08, Pittsworth 01 to 02, T19, T20, T27, T28, T29, T67, T68, Yarraman 01 to 03

Other specific changes are listed in the following tables.

| TRPS Maps | Address                   | Lot and RP     | Previous Zoning                                          | New Zoning                                   |
|-----------|---------------------------|----------------|----------------------------------------------------------|----------------------------------------------|
| T54       | 263 Hursley Road          | Lot 162 AG347  | Sport and Recreation                                     | Emerging Community                           |
| T46       | Charlton, Warrego Highway | Lot 1 RP162601 | Medium Impact Industry: transport and Warehouse Precinct | Local Centre Zone Commercial Centre Precinct |
| T56       | 185 Bridge St             | Lot 9 RP16467  | Low Impact Industry                                      | Community Facilities (Government Precinct)   |
| T56       | 86 Brook St               | Lot 1 SP234284 | Low Density Residential                                  | Community Facilities (Government Precinct)   |

|      |                                                           |                                                                  |                                                                                      |                                                               |
|------|-----------------------------------------------------------|------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------|
